International Herald Tribune
GENEVA — Twelve of the 13 OPEC countries endorsed a pro-posal Thursday for independent auditing of production and pricing practices of the cartel's members.

But Tam David-West, Nigeria's oil minister, arriving late Thursday, refused to say whether his country would support the move. His silence raised speculation that Nigeria had serious objections or wanted to bargain.

The ministers, reconvening the regular winter conference of the Organization of Petroleum Exporting Couotries after a five-day break, also remained divided on

pricing policy.
Several ministers warned that **Mock Comet** OPEC must reach a sturdy agreement on both matters if it is to brake the decline in oil prices. Failure to reach a unanimous accord "would be very dangerous, would be fatal for OPEC," said Indonesia's oil minister, Subroto, who is chairman of the conference. chairman of the conference.

Some ministers have predicted that OPEC members will slide into a price war if oo accord is reached. The grim mood reflects OPEC's failure to force up prices despite the Oct. 31 agreement to reduce the group's output ceiling to 16 million barrels a day from 17.5 million.

The auditing proposal, which surfaced last week, is an attempt to stop OPEC members from flouting their own output and pricing rules. Details of the proposal remain un-clear, but it would involve scrutiny of each member's pricing and pro-duction by internationally recognized auditing firms.

"We support it wholeheartedly," an Iranian delegate said. The Iraqi minister, Qassim Taki

at-Oraibi, said his country accepted the idea but might seek modifica-The solar wind blew this thing away very rapidly," said Bob Camero, a scientist in a National Aeronautics and Space Administration tions. He did not elaborate.

his country had planned to reject the proposal co the ground that it would infringe on sovereignty. But Ecuadot decided to accept after learning of support for the proposal from other members.

A more contentious issue is bow to bring OPEC's price structure cross said: "Is held that size said closer to market reality.

Nicaraguan Rebels Admit Abuses Against Civilians

By Joel Brinkley

New York Times Service WASHINGTON -- Members of Congress and other government officials say many reports of abuses by Nicaraguan rebels against civilians have come to their attention recently as a result of congressional investigations of the CIA's manual on guerrilla warfare.

Current and former rebei leaders, in interviews over the last few weeks, said that some of their guerrillas had been guilty of atrocities. The leaders said they deplored the acts and they contended they had evidence that the Sandmists were guilty of the same kinds of abuses.

Senator Patrick J. Leahy, Democrat of Vermont, a senior member of the Select Committee on Intelligence, said the committee was likely to investigate the reports of atrocities oeat year.

In testimony to the House Select Committee oo Intelligence this month, the members of Congress and other sources said, CIA officials and others presented evidence that the U.S.-backed rebels had raped, torrured and killed civilians, including children.

cluded testimony from at least one blackmail ordinary citizens so they an irregular army. Many soldiers there?"

in Central America.

The reports included accounts about groups of civilians, including women and children, who were burned, dismembered, blinded or beheaded, the sources said,

Congress ended aid to the rebels ing it early next year.

Early this month, Representative Edward P. Boland, Democrat of Massachusetts and chairman of the House committee, said CIA officers offered the reports of atrocities as one explanation for the agency's guerrilla-warfare manual.

The CIA officials, including Director William J. Casey, told the committee that "they were con-cerned about the stories of kidnappings and assassinations" of civil-ians, Mr. Boland said.

Mr. Boland said the CIA officers told his committee that the agency published the manual so the rebels "could win the hearts and minds of the Nicaraguan population." The manual advised rebels to

Members of Congress and the kidnap Sandinists, to "ocutralize" ber of the rebel group's directorate, then that might happen. But what other sources said the reports in- selected government officials, to said: "It is very difficult to control the hell were the children doing

rebel leader; press accounts, and would be forced to join the rebel join because they have people they reports and affidavits from private cause and to hire criminals who individuals and organizations that would arrange the shooting deaths of fellow rebels so they would become martyrs.

In separate interviews, rebel leaders said they did not know whether the oumber of soldiers disciplined for abuses had increased or decreased in the year since the manual was issued. But one rebel last spring but is to consider renew- official, Bosco Matamoros, said the rebels' behavior had gradually im-

proved over the years.
We have a voluminous file on Sandinist atrocities" as well, Mr.

Matamoros said. He said the Nicaraguan Democratic Force, the largest rebel group, had documented "several bundred cases" of rebel abuses against civilians in the last two years. The abuses ranged from petty theft to murder, he said.

He and other rebel leaders described the problem as a regrettable byproduct of civil war and added that their military courts had issued sentences ranging from demotion to imprisonment each time an abuse was discovered.

Alfonso Robelo Callejas, a mem-

House committee that some rebel

commanders routinely executed

their prisoners, "The practice was common," Mr. Chamorro said, "but it defi-

nitely was not our policy." Other members of the rebel directorate dismissed Mr. Chamorro from the Nicaraguan Democratic

Force, partly because of his public discussion of the atrocity issue. Several leaders of the Nicaraman Democratic Force said Sandinist government officials and their sympathizers had been publi-

cizing the atrocity issue. Adolfo Calero Portocarrero, chairman of the rebel group, said the Sandinists had carried on "an orchestrated campaign to make resistance fighters appear as atro-cious terrorists." He added: "We draw our very blood from the civil-

ians they say we are killing,"
As to killing children, he said: "In Nicaragua everything is militarized. If we attack a military installatioo and there are children there,

Says Superior Backed Attack Against Priest

TORUN, Poland - Three security police officers who admit murng the Reverend Jerzy Popie luszko believed they had high-level support and would be rewarded.

the prosecution told the opening session of their trial Thursday. The public prosecutor said at. Torun provincial court that Captain Grzegorz Piotrowski, 33, Lieu-tenant Leszek Pekala, 32, and Lieutenant Waldemar Chmielewski. 29,

did not think they were doing wrong when they killed the Roman Catholic priest in October.

Father Popieluszko, a militant and-communist and supporter of the banned Solidarity free trade want to get even with."

Edgar Chamorro Coronel, a former rebel leader, said he told the west of Warsaw, on Oct. 19. His body was pulled from the river Vistula 11 days later.

Murder indictments carrying possible death sentences and mini-mum eight-year jail terms were read against the three officers. Their superior at the Interior

Mioistry, Colooel Adam Pietruszka, also appeared at the trial, accused of aiding and abetting the Lieutenant Pekala said in tesu-mony that the priest had been kid-napped to frighten him into aban-

doning his support for Solidarity. The lieutenant, the only defen-

dant to speak on the first day of the trial, said that he belped kill Father Popieluszko but that his death had oot been intended. The indicament said the three ju-

nior officers stopped Father Popie-luszko and his driver, Waldemar Chrostowski, on a country road with the intention of killing them. Mr. Chrostowski escaped by throwing open a door and jumping from the officers' car as they drove

away with the priest in the trunk. The indictment said the priest was beaten unconscious four times when be tried to escape. It said he was tied with a rope round his neck, wrists and ankles

so that be strangled himself as he struggled. It said he was dead when he was thrown into the Vistula. The three officers were also accused of having tried to kill Father

Popieluszko and Mr. Chrostowski six days before the kidnapping by stoning their car as they drove in combern Poland.

The indicument against Colooel Pietruszka said he had used his rank to persuade the three alleged killers to kidnap and murder Father Popieluszko and later obstructed the investigation to find

Lieutenant Pekala said Captain Piotrowski asked him and Lieutenant Chmiclewski in early October to take part in "a dangerous mission connected with Popieluszko" that could result in the death of the priest, whose health was frazile.

The aim was to frighten him into stopping his support for Solidarity and to disclose the hiding places of underground activists, he said.

Captain Piotrowksi said they need oot be afraid of the consequences and that he alone would be responsible to his superiors for anything that happened, Lieutenant Pekala added. Lieutenant Pekala said several

plots were considered.

After the stoning of Father Po-pieluszko's car failed, the three security agents went to Bydgoszcz, near Torun, where Father Popieluszko preached on Oct. 19 "with (Continued on Page 2, Cal. 7)

Famine Goes Far Beyond the Camps Holy City in Ethiopia Overcome by Hunger and Despair

Profits, Pop Music and Videodating in a New China

The writer of this dispatch has just completed a three-year assignment as bureau chief of The New York Times in Beijing.

"Deng is liked because he is practical," a Beijing woman recesses of the radical past and instead harnessing their commented. "People are fed up with ideology."

creativity to glorifying the changes under way in China. By Christopher S. Wren

New York Times Service BELITING — A startling announcement in the official press the other day reminded Chinese how serious their leader, Deng Xiaoping, was about his crusade to modernize

Beginning in 1985, the cabinet-level State Council de-clared, the xixxi, a siesta that habitually follows lunch, will oo longer be allowed in government offices because it saps efficiency. Uotil oow, up to two bours for a bowl of rice and a desktop nap have been common among Chinese bureau-

From oow on, the government decreed, hinchtime will be limited to an bour. Beijing's confidence in doing battle with such sacrosance traditions shows how far Mr. Deng's changes have progressed since a watershed meeting of the Communist Party leadership six years ago gave him his first mandate to overhaul the country.

The experiments have been boldly conceived, yet often cautiously carried out. Mr. Deng and his pragmatic col-leagues have moved carefully, often sidestepping the entrenched system to get things done.

The Chinese leader has succeeded so far because his

policies respond to the aspirations of ordinary Chinese, who prefer a rising living standard to Mao's shrill injunctions of self-sacrifice. They may worry about the effect of policy changes on their wages and prices. But Mr. Deng has yoked his more serious critics to China's now discredited radical

China's drab cides have taken on new vivacity in the last few years. The frugal habit of wearing clothing for "three years oew, three years old, and three years of sewing and mending has given way to colorful oew jackets and jeans for many young people and Western business suits for their

Liu Yandong, a Communist Youth League official, as-sured young Chinese in October that wearing fashionable

clothes conformed with socialism because it helped raise

living standards. Dances, once condemned as bourgeois, are now held to help young people meet one another. Where Man forbade gambling, lotteries have been introduced at some sports events to "enliven the life of youth," as an organizer put it. China even encourages videodating services, bodybuilding

contests, and exercise classes. Change has been less apparent in the field of culture. Classical music, banned as bourgeois under Mao, is once more performed in concert and heard on radio. Some popu-

lar music has even emerged.

But Beijing still balks at opening Chinese bierature and the arts to what it calls the "decadence" of Western artistic freedoms. It retains a tight rein on writers and artists, discouraging them from probing too deeply into the sordid

To bein the oation catch up technologically with the West. more than 33,000 Chinese students have gone abroad to study since 1972. This is more than twice the number sent overseas in the first 27 years of Communist rule.

An overriding preoccupation with improving the quality

of life domestically has caused China to give first consideration to its considerable problems at home.

Mr. Deng recently told Kaare Willoch, the visiting Norwe-

gian prime minister, that the changes he had brought about gran printe minister, that the changes are had brought about would not be suspended now that China was on the right track. He called his program "a kind of new revolution entirely different from the Cultural Revolution," on the basis that it was freeing China's productive forces from the

stultifying egalitarianism of the Maoist era.

Officials insist that Mr. Deng's changes, which are aimed at quadrupling the value of China's farm and factory output in the last two decades of this century, enjoy universal

If the progress of Mr. Deng's policies has been retarded, it has been because of hesitancy and lethargy, the safest expressions of conservatism among China's 20 million gov-

The trend toward a new mandatinate of educated technocrats has left some party members worrying about their own careers. Under the guise of a "consolidation" campaign, the party is now preparing to have its 40 million members reregister in order to weed out those who are radical, cornept, or otherwise unable to swallow the pragmatic new party line. The new policies have quickly taken root in the countryside, where work incentives let China's 800 million peasants

Washington Post Service NEW DELHI - Amid scattered violence that followed the deaths of more than 20 persons in the first phase of the parliamentary elections, millions of Indians went to the polls Thursday in the second phase of voting.

The elections are expected to endorse Prime Minister Rajiv Gandhi's quest for a mandate to continue the political dyoasty be inherited from his assassinated mother, Indira Gandhi.

Election commission officials reported a 45-percent turnout in the 116 election districts in six states that held balloting for seats to the Lok Sabha, the lower, lawmaking house of Parliament.

In the first stage of the election, which began Monday, balloting was held in 16 states and six union territories. The voting will end Friday, in districts in the far north-eastern states of Nagaland and

Meghalaya.
Counting of the ballots in all states but Nagaland and Meghalaya is to begin Friday morning, with final results due Saturday.

13 Dr.

The most important election Thursday was in Andhra Pradesh, where Mr. Gandhi's ruling Congress (I) Party holds 37 of the 42 Lok Sabha seats but is facing a strong challenge from the regional Telugu Desam party headed by the state's chief minister, a former movie star, N.T. Rama Rao.

Mr. Rama Rao, who led his party to a sweeping victory over the Congress (I) Party in the 1983 state assembly election, turned back an attempt in August by Indira Gandhi and her appointed governor in Andhra Pradesh, Ram Lal, to topple the popularly elected Telugu Desam government.

After being summarily removed from office, Mr. Rama Rao led a "Save Democracy" eampaign across the state and was reinstated.

On Wednesday, the authorities reported 22 persons, including two candidates, had been killed in election violence. But they reported only isolated instances of violence Thursday, including one person who was killed when police fired to disperse clashing party workers near a polling place in Venkata-Puram village, in southern Andhra Pradesh.

Five persons were killed in election-related fights in rural districts of the state, according to reports reaching the state capital of Hyderabad, Indian oews agencies reported. Authorities said ballot boxes were stolen in 10 precincts, and that repolling would be held in 40

districts Friday.
In another village in the same

election district, two police constahles were injured when a bomb was thrown at a voting station. Police in Mainpuri, in the northern state of Uttar Pradesh, said that a constable was injured when someone

fired on a polling station. The election commission ordered repolling in 180 voting precincts in six states in northern and eastern India following complaints of attacks on polling stations by rival gangs of party workers in which ballot boxes were either destroyed or removed. The northern state of Bihar alone reported 135

instances of such attacks. M Suspected Sikh Terrorist

Indian security officials returned a suspected Sikh terrorist to India from Manila early Thursday in a chartered aircraft and were said to be questioning him on his alleged role in the assassination of Mrs. Gandhi, The New York Times reported from Delhi.

The suspect, Jasbir Singh, has been identified as a nephew of Jarnail Singh Bhindranwale, the Sikh fundamentalist preacher turned ex-

hundreds of followers during an Indian Army assault last June oo his headquarters in the Golden Temple complex at Amritsar.

Mr. Singh, who is thought to be in his early twenties, has been charged with sedition and terrorism, offenses that carry a maximum term of life imprisonment.

Philippine authorities had denied Mr. Singh permission to enter the Philippines on Wednesday and had detained him at Manila airport after a request from the government in New Delhi.

His detention and return to India ended nearly two weeks of desperate efforts to evade arrest which began with a plea for asylum in Britain. His request was rejected and he was deported to Dubai. There too, he was refused entry but managed to fly to Bangkok where, again, immigration officials ordered him to leave the country.

This time, he traveled to Manila, where he was detained by local officials and handed over to Indian intelligence and police officers

Syria Renews Opposition to Israeli Terms On Departure

DAMASCUS - Syria renewed Thursday its opposition to Israeli terms for a withdrawal from southern Lebanon. It said it supported Lebanese demands for "unconditional liberation."

The official Syrian news agency Sana said President Hafez al-Assad gave the message to President Amin Gemayel of Lebanon at talks in Damascus on Thursday, their third meeting this year.

"Assad assured Gemayel that Syria stands strongly by Lebanon in its pursuit of the unconditional liberation of Lebanon from Israeli occupation and against any concession infringing Lebanese sover-eignty," Sana said.

Lebanon, with Syrian support, has rejected Israeli demands for an expanded United Nations peacekeeping role and for deployment of an Israeli-backed militia when Is-raeli troops end their 30-month oc-

112 Poles Defect to West Germany

FLENSBURG, West Germany (Reuters) — A group of 112 Poles did not return from a shopping trip to a West German port at Christmas, bringing the number who have jumped ship this year to more than 1,900. West German police reported Thursday.

The tourists left their boat at the Baltic port of Travensinde on

Christmas eve and the ship left the next day without them, police said.

Another 800 people have stayed behind on similar shopping trips during the year, police said. In addition, 192 passengers left the craise ship Stefan Batory last month when it docked in Hamburg.

UN Agency on Palestinians to Cut Staff

VIENNA (AP) — The United Nations Relief and Works Agency announced Thursday that it would climinate 38 positions at its Vienna headquarters and indefinitely defer pay increases for 12,000 field workers in the Middle East. The agency is expecting a \$50-million dollar deficit next year, and the moves would save about \$10 million, a spokesman said.

The agency provides education, health and relief services to Palestinian refugees in the Middle Fast. The spokesman, Ron Wilkinson, said senior agency officials would meet Jan. 9 to 11 to discuss further economy measures. He said the meeting was one of two regular policy sessions a year but had been moved forward about a month because of the agency's financial problems.

The agency employs 17,000 people internationally and relies heavily on cash donations from nations, groups and individuals. Mr. Wilkinson said it expected income of about \$165 million for 1985, but needed approximately \$225 million.

Turkey Rounds Up Terror Suspects

ISTANBUL (AP) - Security forces have arrested 107 suspected leftist terrorists in several cities this week in a move to crush underground organizations that rocked the country before a military coup four years

the major move occurred on Tuesday when Istanbut pouce amounced the arrest of 73 suspected militants, belonging to five different outlawed organizations, after a monthlong operation.

The suspects were charged with wounding four soldiers and a policeman in Istanbul in 1980 and with carrying out various clandestine activities, police said. On Wednesday, the regional martial law command based in the Aegean port city of Izmir disclosed the arrest of 22 suspected leftist militants in the provinces of Izmir and Aydin. In a third sweep.

Thursday, 12 suspected terrorists were captured in the central province of

Schroeder Takes a Delayed Shower ...

LOUISVILLE, Kentucky (AP) - Doctors let William J. Schroeder :take a shower Thursday, a comfort for the artificial heart recipient that was delayed by a day when he became too tired after resuming speech and coordination exercises.

Helped by two people, Mr. Schroeder, 52, took his first shower since the heart implantation Nov. 25. An assistant was in the shower with him and the other was outside to check on the portable air pump that powers : the mechanical heart through long tubes.

Also Thursday, Mr. Schroeder was to take a few steps in his room without assistance, using a walker. He used it unaided Wednesday for the first time since he suffered three small strokes on Dec. 13. The plans again included exercises to improve his speech, coordination and strength, which were affected by the strokes. He remained in serious but stable. condition, with his vital signs normal.

Colombia Probing Cocaine Scandal

BOGOTA (UPI) - President Belisario Betancur launched a military investigation into drug trafficking in the presidential palace Thursday after disclosing that a shipment of cocaine was sent from the presidential

press office to Spain.

Alfonso Ospina, chief of staff in the presidential palace, said in a radio interview "the investigation will be taken to its final consequences without regard for which heads will roll." Mr. Betancur has been conducting a nationwide crackdown against the cocaine trade and has extradited suspected drug dealers to the United States.

In Madrid on Monday, the second secretary at the Colombian Embassy, Gustavo Jacome, was arrested and accused of using his diplomatic privileges to simiggle cocaine from Colombia to Spain.

Mandela Said to Spurn Release Offer

JOHANNESBURG (AFP) — The jailed leader of South Africa's banned African National Congress, Nelson Mandela, has spurned an offer for his release to the South African "homeland" of Transkei, the pro-government Afrikaans-language daily newspaper Beeld reported:

Mr. Mandela and seven other persons, including two other ANC leaders, Walter Sisuln and Goven Mbelci, were jailed for life in June 1964 for sabotage and "furthering the aims" of the Communist Party.

The congress, South Africa's most prominent nationalist movement, was banned in South Africa in 1960. The offer and release to an "independent homeland," according to Beeld, also covered Mr. Mbeki

By Spencer Rich

Washington Post Service
WASHINGTON — The Reagan administration will ask Congress for a one-year freeze in Medicare payment rates for hospitals and doctors, with no allowance for in-flation, as part of its plan to cut domestic spending in fiscal 1986, sources said Wednesday.

Earlier, the administration, in documents sent to Capitol Hill, had projected a freeze on payments to doctors but had planned to per-mit an inflation-adjusted increase in the rates hospitals receive for treating Medicare patients.

Now, however, the administration has decided to freeze hospital rates as well as doctors' rates.

Overall, the Medicare proposals would reduce program outlays by about \$3 billion in fiscal 1986 and possibly as much as \$19 billion to \$20 billion over the fiscal years

1986 to 1988. Fiscal 1986 begins Oct. 1, 1985. The budget also is expected to propose an increase in Medicare And a point of a point patients' monthly premiums for the doctor-insurance portion of the program; an increase in the \$75-a-year deductible that Medicare pa-tients must pay under the doctorinsurance program before Medicare begins picking up the bill, and a reduction of subsidies to teaching bospitals.

However, a major change in the way Medicare reimburses hospitals for eapital investments, which would have limited payments for expansion, probably will not be mcluded in the budget, sources said, but will be proposed later in the

Among the major changes ex-pected to be proposed by President Ronald Reagan are:

• The rates Medicare pays hospitals for each patient admitted would be frozen at current levels for fiscal 1986 instead of being increased to cover inflation. In fiscal 1987 and 1988, they would be al-lowed to rise to keep pace with the inflation rate for the so-called medical market basket, a package of items that hospitals buy. The market basket increase usually runs higher than overall inflation in the ecocomy. Fiscal 1986 savings: \$2.03 hillion.

Under the new prospective payment system for Medicare voted by Congress to 1983, hospitals are oo longer paid oo a per-day basis for the care of Medicare panents. Instead, the government sets fixed rates in advance for each different type of illness, covering the entire stay. The hospital does oot receive anything extra if the patient is kept longer, so there is no incentive to pile on extra days that would increase Medicare payments.

Under Medicare, the hospital must accept the government pay-ment as its full payment, although when the patient receives some-thing extra that Medicare does not cover, for instance, a private room, instead of semiprivate, the patient may be billed separately.

· Rates paid to doctors for various Medicare services would also be frozen at current levels without any inflation increase. This would be the second such freeze; Congress has already voted a freeze for the 15 months started July 1, 1984. Fiscal 1986 savings: \$600 million.

Medicare, the program of health insurance for the elderly, is by far the largest medical program in the United States, with estimated outlays of \$68 billion in fiscal 1985 for the care of 30 million aged and disabled Social Security beneficia-

U.S. Sonar System Is Seized in Japan

TOKYO — Japanese customs officials, acting on a U.S. request, barred export of a U.S.-made submarine tracking system as it was about to be shipped to the Soviet Union, a Foreign Ministry official said Thursday.

The sonar system is on a list of high-technology items banned for export to Soviet bloc countries by the Paris-based Coordinating Committee for Exports to Commu-nist Areas, or COCOM, which comprises Japan, the United States and 13 other industrialized coun-

An official of the ministry's Economic Affairs Bureau said the product was held at the request of the U.S. government. The economic newspaper, Nihoo Keizai Shimbun, said the U.S. government had asked allied countries to watch out for the advanced sonar system for fear that it would be shipped to an Eastern bloc nation.

President Sandro Pertini of Italy, right, and Renzo Imbeni, the mayor of Bologna, attending the state funeral in Bologna of the 15 persons killed in the train bombing. Pertini Attends State Funeral for 15 Killed in Train Attack Near Bologna

train near here on Sunday.

The coffins of the victims were not at the service in Bologna's St. Petronius Basilica, which was at-tended by President Sandro Pertini of Italy and other political leaders. Relatives of the victims preferred private burials in their bometowns. In a homily, Archbishop Giacomo Biffi of Bologna declared, "Bologna is tred of having is name connected with these outrages. We ask that, at long last, the assassies be identified and brought

After the service, the city's Communist mayor, Renzo Imbeni, charged that the bombers enjoyed the protection of Italy's state appa-ratus. In response, the crowd chanted. "We want justice."

funeral service on Thursday for the crowded train in a tunnel south of 15 persons killed by a bomb on a Bologna, despite numerous claims

by political extremists.

"But we know why they could kill," Mr. Imbeni said. "Because this terrorism by massacre goes unpunished." The mayor said that 140 persons

had died since 1969 in five bomb attacks attributed to neofascist groups, but that no one had been found guilty of the attacks.

Those who placed the explosives in Brescia, Milan, and in three railroad attacks near Bologna had escaped "because there was complicity and protection within the state apparatus," Mr. Imbeni charged.

Last month, a magistrate in Rome indicted four former officers of the secret service and two civilians on charges that included the possession of explosives. Judicial Mr. Imbeni said that investiga- sources say that investigators be-

U.K. Arrests 6 Said to Plot **IRA Bombing** On Shoppers

The Associated Press

LIVERPOOL - British police said Thursday that they had arrested six men under Britain's Prevention of Terrorism Act. But they rests and apparently little progress refused to comment on a report in identifying the origins of the that the arrests thwarted an Irish group, which calls itself Cellules

in this northwest England port city and "certain items were taken away for forensic examination," a police spokesman said.

But he declined to identify the men, describe the circumstances of their acrest or say what items had been configurated

The London Daily Mail reported Thursday that the arrests were connected with a major police opera-tion that it said is believed to have thwarted a mission by Irish terror-ists to plant bombs on the British

mainland.
"Several pounds of suspicious substances were also seized," the paper said. It added that "forensie tests are due to be carried out today but police are almost certain that the material is high explosive."

The newspaper noted that Liverpool has a large Irish immigrant population and that IRA operatives have used the port to enter mainland Britain in the past.

The Daily Mail also noted that the arrests came "just before the big sales are due to bring millions of shoppers crowding toto city centers, a perfect target for any terror-

A bomb outside Harrods department store io London on Dec. 17. 1983, during the Christmas shopping rush, killed six persons and injured 94. The Irish Republican Army said that IRA "volunteers" were responsible.

Belgian Police Make Little Progress In Search for Anti-NATO Bombers

By Steven J. Dryden International Herald Tribune BRUSSELS — The search for an underground group carrying oo a "war against NATO" in Belgium

has become a major challenge for authorities here seeking to end its three-month bombing campaign. Belgian police have made no ar-

Republican Army bombing conspiracy possibly aimed at holiday shoppers.

The six were detained Monday

multipational companies with crude explosives made from pressure cookers to a coordinated series of bombings in southern Belgium earlier this month. This series knocked out a major branch of the emergency fuel pipeline main-tained by the North Atlantic Treaty Organization.

With each new attack, more theories about the group appear. Some Belgian officials speculate that the group may have links to the French terrorist group Direct Action. Other officials note that

the Belgian group, when claiming responsibility for its attacks, has quoted with approval the commu-niques of the Red Army Faction from West Germany, another an-

ui-NATO group. In one of its communiques, the Belgian group said its "war against NATO" and "military imperialism" was being pursued in other nations by "fighting Communists." Belgian investigators have met with their French and West German counterparts but so far have not revealed any firm evidence of col-

laboration between the French, German and Belgian terrorists. Several Belgian newspapers and magazines have suggested that despite its Marxist rhetoric, the Fight-ing Communist Cells may really be an extreme rightist group aiming to discredit the left and bolster the

government's police powers. "It's all very mysterious," said one Western diplomat. The group "appears to have no existence out-side of these isolated acts of sabo-12PE

NATO has tightened security at Brighton on Oct. 12. Five people where two of the bombings took were killed. One of the 31 injured place. But one alliance official commented, "we'd feel more comfortable if we had more information" about the group.

One of the bombs damaged offices of Honeywell-Europe, a U.S. defense contractor located a quarter mile (400 meters) from the entrance to NATO's headquarters. Foreign terrorists have often

days the period that police can de-used Belgium as a combat zone in taio suspects without formal recent years. But the country has not suffered from the domestic political violence that has plagued other West European governments. The Fighting Communist Cells

have shown annoyance with the tranquility in Belgium. The group has said that it wished to launch the "armed political military struggle in this country, which until now has been too little touched by the struggle for communism."

Another statement noted that Belgium has a "limited but central place" in the "imperialist military machine" as evidenced by the NATO decision to locate both its political and military headquarters on Belgian soil.

Prime Minister Wilfried Martens of Belgium, following the October bombing of his office in the provincial capital of Ghent, warned that the unusual attacks threatened political liberties in Belgium.

"Belgium has always been a model of democracy," Mr. Martens said. "All tendencies have been allowed freedom of expression. This tradition should not be put into danger." A few days later, police raided

more than 100 bomes and offices searching for evidence and sus-pects. Fifteen persons were taken in for questioning but all were quickly released.

political controversy because all the targeted individuals and groups were from the left.

At the same time, public impatience has been growing over the government's inability to stop the bombings. The Brussels newspaper: Le Soir said recently that the group's ability to attack with "un-punity" showed the "powerless-ness" of the police.

Following the pipeline bombing, Justice Minister Jean Gol said 250, more police officers would be hired

in 1985 to help counter terrorism. Unlike many terrorist groups in Europe, the Belgian group has avoided such tactics as kidnapping or bombings of public areas that could endanger life.

Each target has had a direct or symbolic link to NATO. The at-tacks began with bombings against three firms that supply parts for NATO's cruise and Pershing-2 missiles. The second wave of bombing was against offices of the Christian Democratic and Liberal parties. members of the government coalition that has supported deploy-ment of cruise missiles in Belgium.

The third set of targets has so far included military air control anten-nas and the NATO pipeline.

Pentecostal Leader in Soviet Reported to Be Under Arrest

By Celestine Bohlen Washingson Pest Service

MOSCOW - Authorities in the Soviet Far East have arrested the pastor of a small coogregation of ethnic German Pentecostalists after parents in the group took their children out of Soviet schools, according to sources in Moscow.

Pastor Victor Walter, 34, was one of three men arrested Dec. 10 in Chuguyevka, northeast of Vladivostok, near the Sea of Japan, according to travelers reaching Moscow recently. The other two were emigrate from the Soviet Union. later released but Pentecostalist sources said Mr. Walter, a former machinist with nine children, is still being held on charges of providing religious education to children. Eight Pentecostal families re-

portedly decided jointly to take 27 of their children out of the local schools after the youngsters reported that they were harassed, and in some cases beaten up, by school-mates who taunted them for their religious and ethnic backgrounds.

As he spoke, the Izvestia report

said. Akran Garan, a nearby town, was virtually under siege by about 1,000 guerrillas.

The garrison had used up almost all of ammunition and sulfered serious casualties," the account said. Finally, the local Soviet commander decided to resupply the outpost by helicopter rather than abandon it, the report said.

President Ronald Reagan said

Thursday that the Soviet occupatioo of Afghanistan ranks along-side the Japanese attack on Pearl Harbor as a "day of infamy," The Associated Press reported from Washington.

The president, headed for a vacation in California, said that "a president once called a certain day a day of infamy. I guess that's exactly what this is also. The anniversary of a day of infamy."

The Soviet Union has reportedly put its troops on alert to guard against rebel attacks, while an Afghan guerrilla leader vowed to step up fighting in 1985, United Press said "the outlook is oot encourag-loternational reported from Islaming." The Associated Press reportet military commander as saying: abad, Pakistan.

"The coming year will be a very sensitive one because we are planning to launch massive attacks on Kabul and other parts of Afghanistao." Gulbuddin Hekmatyar, head of an Islamic Front rebel faction, said Wednesday.

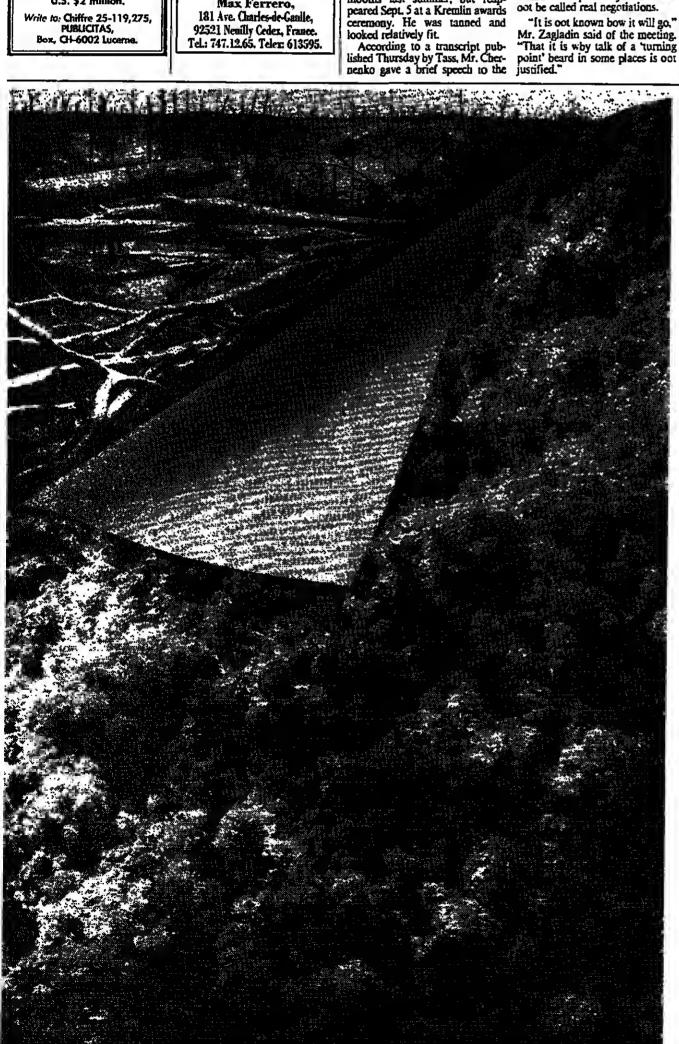

Western diplomats, meanwhile said in Islamabad that security was tightened around Kabul and other key government sites in Afghanistan with the approach of the anni-

Io Washington, the Federation for American Alghan Action, said Wednesday that between \$380 million and \$400 million had been spent in U.S. arms aid to Afghan rebels, but only \$50 million worth had actually reached them.

The United States, at first covertly through the Central Intelligence Agency, but now with the blessing of Congress, has been supplying the Afghans with Soviet and East bloc arms captured in wars in the Middle East, Vietnam and else-

■ U.K. Urges Withdrawal

Sir Geoffrey Howe, the British foreigo secretary, on Thursday urged the withdrawal of Soviet troops from Afghanistan, but he ing." The Associated Press reported from Loodon.

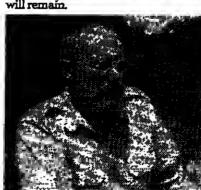

Plants have fed the world and cured its ills since life began.

Now we're destroying their principal habitat at the rate of 50 acres every minute.

We live oo this planet by courtesy of the earth's green cover. Plants protect fragile soils from erosion, regulate the atmosphere, maintain water supplies for agriculture and prevent formation of deserts. Without plants man could oot survive.

Yet, knowing this, we are destroying our own life-support system at such an alarming rate that it has already become a crisis - a crisis for ourselves and an even bigger ooe for our children.

The figures alone should tell the story - we destroy a tropical rain forest three times the size of Switzerland every year; within 25 years only fragments of the vast Malaysian and Indonesian forests

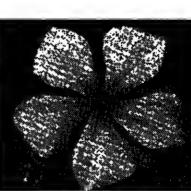

Dr. Richard Evans Schultes, director of the Botanical Museum at Harvard University, has spent 13 years in the Amazon jungle collecting the 'magic' plants of myth and legend and making them available to Western medicine and science. "The drugs of the future," he says, grow in the primeval jungle."

What we are destroying

Much of the food, medicines and materials we use every day of our lives is derived from the wild species which grow in the tropics. Yet only a tiny fraction of the world's flowering plants have been studied for possible use. Horrifyingly, some 25,000 of all flowering species are on the verge of extinction

Once the plants go, they are gone forever. Once the forests go only wastelands remain.

Photo: (Forest) Bruce Coleman/Brian Coates

athananthus roseus. Many of the world's ildren who have suffered from leukaemia are now alsoe due to the properties discovered in the rosy periwinkle, which originated in Madagascar where 90% of the forests are already destroyed.

Who is the villain?

There is no villain - except ignorance and sbort-sightedness. The desperately poor people who live in the forests have to clear areas for crops and fuel, but they are doing this in such a way that they are destroying their very livelihood.

Add to this the way in which the heart is being ripped out of the forests to meet the demand for tropical timbers and we have a recipe for disaster.

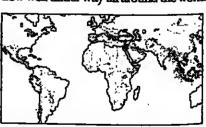

isease-resistant potatoes, obtained by cross-reeding wild potatocs from the Andes with stic varieties, ensure that Ireland will never again experience the blight disease which wiped out its entire crop, leaving a million people to die of starvation.

What can be done about it? The problem seems so vast that there is a tendency to shrug and say "What can I do?" But there is an answer. There is something that each and every one of us can do.

The WWF Plant Conservation Programme

The World Conservation Strategy. published in 1980, is a programme for conserving the world's natural resources whilst managing them for human oeeda A practical, international plant conservatioo programme has been pre-pared based on WCS principles and is now well under way all around the world.

The Vavilor Centres. Named after the Russian scientist scho identified them. These are the regions in echich our major crop plants were first domesticated. Many of these regions contain wild or semi-domesticated relatives of commercial species schich can be cross-bred with crop plants to increase vield and resistance to pests and diseases.

your voice and your financial support. Get in touch with your local WWF office for membership details, or send your cootribution direct to the World Wildlife Fund at: WWF International, Membership Secretary, World Conservation Centre, 1196 Gland, Switzerland.

Which international movement was one of the most successful again in 1984?

The BMW society of the world's most demanding drivers.

1984 was yet again a year of extraordinary success for BMW.

Following many exceptional years, another one of significant growth. And this was achieved despite the setbacks created by the weeks' long strike in the Federal Republic.

As the result of a singleminded and con-certed effort in both the domestic and export markets, BMW succeeded in regain-Ing much of the lost ground and, with a total of 430,000, succeeded in producing and selling more cars than in the previous

year. At the same time, the company's turnover has risen yet again, to over 16 billion

And 1,500 new jobs have been created, even though – for strike-related reasona – this didn't quita match forecasts.

The world's most demanding drivers profit by BMW. And BMW by them.
BMW'a positive results can be related, not least, to the enormous vote of confidence given by the large number of new buyers, who have felt that the particularly high demands they make on a car are best realised by BMW.

By their decision to opt for the most advanced automotive technologies avail-able, informed and discerning buyers have acknowledged their understanding of BMW's dedication to innovation. Because they have fully appreciated exactly what BMW means by exclusivity. Namely, status through progress, and not for its own sake.

Whoever decides on the car with the more advanced technology, acquires not only greater potential.

But also demonstrates a fine appreciation for the signs of our times.

As far back as 20 years ago, BMW had already started reacting to the fast-changing parameters of modern motoring – quite voluntarily, without any outside pressures or influences.

pressures or influences.
That's because the belief in concentrating on essentials has always been a corner-stone of the BMW philosophy. And because we have always regarded pioneering technologies as the best possible basis for handling materials and energy more responsibly, and for preserving both our valuable resources and the environment.

That's why, for instance, BMW haa always been committed to sensible engine capacities and cylinder numbers, which are in tuna with the needs of their

For years the BMW im-line, 6-cylinder engine has been regarded as the epitome of engine technology.

And through the introduction of new, ultra-modern electronics, BMW has given thia legendary concept even greater farsightedness and security for the future.

Whoever drives with the new sense of awareness, will discover its ultimate expression in a BMW.

No other car manufacturer exploits the

benefits of modern electronica as comprehensively or as consequentially on their standard production cars as

With the aim of not only making motoring more efficient, safer and more comfor-table, but also of making it more economy and ecology conscious at the same time. So it's not surpriaing that BMW had already Introduced tha world's first computercontrolled engine by 1979. Today, 96% of all BMW cars feature elec-

tronic fuel-mix controls.

BMW was also the co-developer of ABS, the revolutionary anti-lock braking aystem, which today is standard on a full 50% of all BMW modela.

driver information systems, no-one has progressed as far as BMW.

Concentrating on essentials is no limitation. Rather, it's the intelligence needed to anticipate the future.

And stemped to developing corp which

is dedicated to developing cars, which incorporate new technologies of the very highest standard.

For those drivers who share BMW's

Equally, there's no doubt that BMW's current market position today is directly linked to this phliosophy.
And both combine to create the optimum

basis for ever greater success in the future. Even if it must be accepted that this will

never come cheaply.

That's why BMW – incidentally, the only car manufacturer you'll find amongst the list of the top ten most research intention. sive, publicly quoted West German companies – Intenda to commit the bulk of its exceptionally large investment budget to innovations, designed – and capitallsing on our world-wide lead in automotive micro-electronia - to make motoring even more efficient and economical in the future.

in the coming years, BMW will continue to redouble its efforts with all its usual energy and vigour - to the benefit of everyona who, like us, believes in pushing progress to its limits.

At the same time, wa'd like to thank every-body – whether they be customers, supp-

liers or co-workers. And we wish you all in 1985, what you have helped ua achieva in 1984: much success.

BMW AG, Munich

A Mirage in the Heavens

In his "star wars" speech of March 1983, President Reagan challenged scientists to devise a defensive shield capable of "eliminating the threat posed by strategic nuclear missiles." The overwhelming response of scientists and defense experts is that it cannot be done. But Mr. Reagan will not take no for an answer.

His own senior officials regard the immediale purpose of the "star wars" program as the defense of missile silos and military targets, not cities. That is far different from the total shield Mr. Reagan called for. Yet when the change of purpose is pointed out, he reiterates the program's original goal: "It's not going to protect missiles. It's going to destroy missiles."

Analyses by the Union of Concerned Scientists and the Office of Technology Assessment have explained the unworkability of a missile shield defending the whole country. Former Secretary of Defense Harold Brown has concluded that "there is no realistic prospect for a successful population defense, certainly for many decades, and probably never."

Experts are not always right, even in consensus, and Mr. Reagan's preference for his vision merits a mark for persistence. But he has misunderstood the nature of the challenge posed by a "star wars" defense.

The technical requirements of a defensive shield are not forbidden by the laws of physics. There has been progress with exotic devices of possible use in a shield, such as atomicpowered X-ray lasers. There is technical merit in the idea of "layered defense," with space-based weapons attacking missiles in their

boost phase and in midcourse, and ground-based defenders catching the survivors. But, unlike the moon landing, which was

merely a struggle against the laws of gravity, a "star wars" shield would be vigorously opposed by Soviet countermeasures. The spacebased elements of the system would remain extremely vulnerable, the detection and tracking systems would provoke determined efforts at deception and the Russians would strive to increase their offensive missiles to offset whatever protective ability remained.

And the whole intricate network of satelthes, computers, missiles and beam weapons would have to work perfectly the first time, since penetration by only I percent of the 8,000 Soviet warheads would be disastrous. The delays that accompany a single shuttle launch illustrate the likelihood of unrehearsed success by a multi-component system.

Hence it is no surprise that officials, from the president's science adviser to the Pentagoo's chief scientist for the "star wars" program, have been emphasizing "transitions goals while paying lip service to a total shield as the ultimate goal. These transitional goals differ little in essence from the missile defense schemes that both superpowers renounced in the ABM treaty of 1972 because they threaten the stability of the nuclear balance.

President Reagan cannot be faulted in wisbing for total security. But to promise a total shield that has almost no tangible basis in reality is to step from hope to delusion.

there comes a diplomatic version -

Reckoning the Japan Variable

P ARIS — Confident of economic success, the Japanese are working less and engaging more in introspec-tive debates on their identity and international status. The present Nakasone line, emphasizing a more visible diplomatic presence in the world, reinforces the prime minister's popular support. This growing assertiveness has had mitigated success lately, as when the Japanese tried to play a mediating role in the Iran-Iraq war.

Japan's eagerness to reduce the gap between its economic strength and its political weight in the world suffers from contradictions. In particular, the Japanese seem to want prestige without risks. Present Japanese policy seems to be based on a somewhat artificial attempt to dissociate diplomacy from defense. Even if the selfimposed limitation of military spending to 1 percent of the budget is unlikely to survive beyond 1985, the Japanese mood is for more diplomacy, not for more defense.

The Japanese are conducting their

diplomatic overtures with great prudence vis-à-vis the United States. Nevertheless, their ultimate goal is to increase their margin of maneuver. The relationship with America has improved much since the 1950s. The

U.S. security guarantee is not questioned in Japan, as it often is in Europe. Yet many Japanese wonder if a more autonomous Japan would not be better able to resist what are sometimes seen as U.S. economic diktats. When it comes to defense, howev-

sarily reinforces this priority.

But if Japan is "Western" in terms of alliance, it is "Northern" in terms of economic achievement. Participation in the annual summit conference of the seven leading Western eco-nomic powers is proof of success and as such, particularly appreciated.

A third dimension of the Japanese

identity is geographic and increasing-The Pacific Basin is the world's fastest growing economic zone, and Japan tends to promote, especially in its relationship with ASEAN countries, its geographic identity as a Pacific power. At the same time it stands apart, due to a strong sense of superi-only and so as to alleviate the uneasiness of other Asians vis-a-vis a his-

torically imperialist neighbor.
A fourth dimension stems from a desire to stand off from the West in dealings with the South. Because they were not former colonial powers in the Middle East, a region on which they depend heavily for oil, the Japa-nese have tried to stand off the West at a time when the West was rejected. This policy was applied during the 1980 hostage crisis in Iran with a lack of subtlety that proved counterproductive for dealings with the United States. The Japanese have lately improved their tactics, although without fundamentally altering their strategy. prompted by the president, took it back. He said Mr. Reagan will not give up" the "star wars" program, "or the opportunity to develop it." Early next week the White House

In recent conversations in Tokyo I sensed a fifth dimension of Japanese identity, based oo culture. Together with China and other countries of the region, Japan shares a culture based on Confucianism and Buddhism. As China modernizes, giving the impression of moving away from communism, this common cultural heritage, combined with the attraction of a technological model, may make the Japanese privileged interlocutors of the Chinese.

In a country of such stark contrasts as tea ceremonies and ceremonial suicide, serene order and exacerbated violence, a multifaceted diplomacy comes as no surprise. But can Japan

afford the luxury of ambiguity?

Japan's mastery of diplomacy lags
far behind its mastery of technology. The country is slowly entering a tran-sitory phase in which the classic contrast between economic giant and political midget will be an anachronistic legacy. Sooner or later the Japanese will have to define in a more explicit and active way their contribution to Asian security and, more broadly, their political role in the world.

The writer, associate director of the Institut François des Relations Internationales, contributed this comment to the International Herald Tribune.

Lebanon Is Hard to Leave

Israel, eager to end casualoes and to put a bad war behind it, bad wanted to negotiate its way out of Lebanon. But the Lebanese government, powerless and bound by Syrian high strategy, has made that impossible for oow. It is not clear whether the Israelis will return to Naqoura in January for another round in their. United Nations-sponsored withdrawal talks. The signs are, bowever, that they realize that the negotiations are not promising and they must tackle these decisions oo their own.

Broadly speaking, the Israelis have three choices. One is to do oothing, but the casualties and other costs make this impossible. A second — full unilateral withdrawal — is beyond the capacity of a government that includes as an equal partner a party, Yitzhak Shamir's Likud, unready and unwilling to write off its war. That leaves the third choice: partial withdrawal, which is what Prime Minister Shimon Peres and Defense Minister Yitzhak Rabin, both of Labor, are plainly committed to. A cabinet decision is expected before long. If it is not forthcoming, this will mean that Mr. Peres has defaulted on one of his leading campaign promises (the other was to repair the ecocomy), and it will be hard to see wby he deserves to remain prime minister.

Why did Syria insist that the Lebanese government stick to the laughable demand that

Israel turn over to the Lebanese army, a puppy dog, all of southern Lebanon down to the Israeli border? Syria calls all the shots in Lebanon and does not explain its reasons. In any event, Damascus remains responsible, in fact if not in name, for what happens in the parts of Lebanon that Israeli forces evacuate. The expectation is that Syrians and Israelis will set up a new series of "red lines" indicating their common intent to treat Lebanoo as a buffer between them and to avoid menacing each other's vital security interests. As usual, it falls

to American diplomacy to be the go-between. The withdrawal now being cootemplated excludes eastern Lebanon, where an informal "red line" already ensures that Israeli and Syrian forces very near each other remain tightly controlled. The main withdrawal will affect southern Lebanoo between the mountains and the sea. It will liberate most of Israel's current Shia tormenters. It will be up to the Shias, and to United Nations peacekeepers also in the area, to take over the role that the Israelis have played of dampening intra-Lebanese strife and blocking the return of Palestinian gunmen. As a practical matter, the effective performance of these tasks could make possible early Israeli evacuation from the last piece of southern Lebanon.

- THE WASHINGTON POST.

Other Opinion

The Nuclear Club Is Crashable

Such is the nature of the nuclear club that unless the current members put their heads together more effectively, the club will get bigger. [Washington and Moscow] share much of the blame for an international climate that yields no control of such destructive weapons and in fact fosters governmental longing for them. The Nonproliferation Treaty of 1970 calls for "negotiations" to find "effective measures" for the cessation of the nuclear arms race "at an early date." The United States and the Soviet Union have done little to comply.

No tight agreement on nonproliferation could reduce tensions between Pakistan and India, or between Israel and Libya. But as long as both superpowers plunge ahead with deployment of more and more nuclear weapons, as long as severely strained relations bar them from bringing political and economic pressure on smaller nations, there is little chance of limiting membership in the club. If there is one clear consequence of four

years of failure in nuclear arms negotiations. for which a deeply divided Reagan administration deserves much of the blame, it is the mindless advance of nations toward membership in the club. Five members now have 50,000 bombs. What's a few more?

- The Baltimore Evening Sun.

Evidence that the Iranians are committed to acquiring a nuclear bomb keeps popping up. In January, [Ayatollah] Khomeini reportedly sent a group of Iranian physicisis to Europe. In

an interview published six months later in "Le Figaro," the Israeli ambassador to France made a veiled warning: "I am convinced that Khomeini is trying to obtain the means of constructing his own atomic bomb ... We bave already saved the West from catastropbe

by destroying the [Iraqi] nuclear reactor."

How the Iranians might pursue a shortcut to getting the bomb is hinted at in the U.S. Congressional Office of Technology Assessment report [published in September]. It notes that "nuclear proliferation in the Middle East is likely to increase during the next decade because new supplier states, such as Argenti-na, Brazil and India, that are not parties to the Nonproliferation Treaty may be willing to sell sensitive facilities." In addition, Iran may seek nuclear material on the black market. By some accounts that is bow Israel obtained its bomb. In June, Judge Carlo Palermo of Italy released a report alleging that a group of international arms traffickers have provided Iran with bomb-grade uranium and plutonium.

- The Nation (New York).

The Carnegie Endowment for International Peace issued a report [in October] asserting that Israel is probably capable of deploying 10 to 20 Hiroshima-size atomic bombs. Leonard . Spector, author of the study, said that South Africa may have a similar capability. One of the report's most chilling findings is that a nation with the ability and desire to build a nuclear arsenal can now do so without test explosions, thanks to computer simulations.

Business Is Campaigning Against the Profit Motive

By Robert J. Samuelson

WASHINGTON — The Ameri-can business establishment has reacted with dreary predictability to the Treasury's plan for tax reform The proposal, we are told, would clobber corporate profits, reduce investment and damage the economy. Phooey. Half-truths at best.

The heavy-handed response illustrates why business does not command public respect on major political and account of the command public respect on major political and account of the command public respect on major political and account of the command of the com cal and economic issues. People believe, correctly, that businesses speak only for themselves — what's good for Joe's Desktop Computers is good for the country—and therefore are not worth listening to. The result is a political power vacuum. With most industries plugging their own interests, no one speaks for policies that would promote a genuinely healthier business climate.

The tax plan is a case in point. It aims to increase the efficiency of business by reducing the buge discrepancies in tax rates that divert investment from its most productive uses. The proposal has aroused widespread business opposition because it threatens tax breaks cherished by industries as disparate as commercial real estate and electronics.

The plan would cut the top corporate tax rate from 46 to 33 percent; at the same time it would raise the total corporate tax burden 25 percent by eliminating many preferential tax provisions. The central question is thether the rise in total taxes (discouraging investment) offsets the re-duction in tax discrepancies (enhancing the efficiency of investment).

It is hard to know, but I am skeptical of two economic studies - one by Wharton Econometrics, the other by Data Resources — that say invest-ment will suffer. Neither study considered the possible benefits of more efficient investment. Both were un-

derwritten by business groups.

A rebuttal comes from Harvard economist Dale Jorgenson, whose computer model examines efficiency gains. He figures that the Treasury plan would raise GNP in 1990 by about \$110 billion at today's prices, or 3 percent more than would exist-ing law. This analysis is huttressed by the fact that much of the tax increase would fall on a few industries now beavily favored — oil, insurance, banking, Logically, these increases should not cut investment elsewhere.

Strange as it may seem, business opposition to the tax plan amounts to a campaign against the profit motive; most industries are more interested in their familiar tax breaks than in overall economic efficiency.

People see profit as a necessary evil of capitalism without fully appreciating its function. When the profit monve works properly, it directs invest-ment funds and labor to their most productive uses. Consider a computer software firm that earns a pre-tax profit of 20 percent on its investment and a large manufacturing firm that earns 15 percent. The message is that society should devote more of its resources to the software company.

You can imagine dozens of reasons for this. More software might extend computers to dozens of new applica-

A \$1 Gasoline Tax Would Solve Big Problems

tions - from manufacturing control to insurance claims - with huge increases in efficiency. Or maybe there is too much manufacturing capacity. Who knows? The marvel of the profit mechanism is that it automatically signals where investment should go without detailed answers.

crepancies because all business in-

usual. However, we must put the fu-

enter a period of inexorable decline

some time in this decade. Is it asking

too much to urge lawmakers to put

their demagogic speechs about "re-gressive taxes" in their pockets and

pass a tax that will encourage their

constituents to start making smart

AVVIH come is not taxed in the same way. If vestment decisions is critical. Frank-

Taxes can devastate this benevolent arithmetic. Assume that taxes take away half the software firm's profits but only a fifth of the manufacturer's. The profit signals are reversed. The software firm has an after-tax profit of 10 percent against the manufacturer's 12 percent. Investments are made on an after-tax basis. Now the incentives point to investing where it does the least good. The tax system bristles with dis-

you don't think the distortions matter, examine the office-building glut in America. Since 1981 the vacancy rate has jumped from 4 to 14 percent. In part, the 1981 tax law encouraged an office-building boom by enhanc-ing real estate write-offs that would cut investors' taxes on other income. There is a destructive logic of waste at work. Ultimately, overinvestment in tax-favored industries will so reduce profitability that even tax advantages will be offset. Perversely, though, many industries are so wedded to specific tax breaks that they cannot imagine life without them.

This explains the apparent para-dox of how the Treasury proposal could be good for business even if much of business happens to be opposed to it. Either you believe in the profit motive or you don't

When we subsidize something, we get more of it than we need — no matter how worthy it sounds. The venture-capital industry, for example, complains that one provision of the tax plan — eliminating preferenture of the country first. Ominous tial treatment of capital gains warnings are flashing: Unless there is a shift. America will claim the title would make starting new companies more difficult. But there is no special "world's largest debtor" next year; and the official statistics are saying that domestic petroleum output will virtue in new firms. When a smart engineer leaves a job in a large firm to start a new company, it's terrific when it succeeds; when it flops, it's a waste, not only for the individual but also for the old firm that lost a key worker. Risk-taking is good, but many start-ups will fail. There is no more public interest in subsidizing a high failure rate than there is in subsi-

decisions now - decisions that will dizing empty office buildings.

The efficiency of business is a great national asset or be improved, but the basic principle of reducing tax considerations in in-

ly. I wonder whether the corporate obbyists know what they are doing: Along with everyone else who regards the Treasury proposal as too radical, they may be able to kill it entirely. But that will not be the end of the story. To cut budget deficits, Congress will remain on the prowl for tax increases. Business will then be more vulnerable. It is easier to tax corporations, which don't vote, than people, who do. So Congress might enact some of the Treasury proposals piecemeal. Business might end up with the worst of both worlds: higher taxes without lower rates. And that would burt everybody.

Newsweek

LETTER

'Star Wars,' but Jointly

Like it or not, the "strategie de-fense initiative" is the only potentially workable approach yet proposed to reduce superpower dependence on nuclear arms. Unfortunately, it threatens stability, which requires that the superpowers develop their strategic defense know-how in a par-allel, orderly fashion. President Resgan's suggestion to share American know-how with the Soviets once it is developed fails to provide for stabil-

ity in the intervening period. One answer might be to make a joint U.S.-Soviet SDI research project the centerpiece of a nuclear arms reduction accord. Simultaneous dissemination of know-how within both countries would then be possible as would the maintenance of stability during the transition period, Sharing the research effort could mean considerable economies for both powers.

ARSTEIN RISAN.

FROM OUR DEC. 28 PAGES, 75 AND 50 YEARS AGO

1909: The Middle Kingdom Awakens NEW YORK — The awakening of China arouses comment. The Buffalo Commercial says: "China appears determined to become one of the Great Powers, not for purposes of aggression. but for defense only. That is the explanation of the [naval buildup] given by leading Chinese statesmen." The Washington Post: "What bappened m Japan is now happening in China. Yes, the Middle Kingdom is wakening, and awakening with a vengeance." The Baltimore American: "If China is really richer in agricultural possibilities than the United States, the talk about the future of the Oriental trade has more significance than most people attach to it." The Galveston Tribune: Investment by China of \$10,000,000 in American education is but the beginning of an influence for the good of both nations."

1934: A Is for Apple, M for Marxism SCARSDALE. New York — Display of Marxist posters on the walls of the fourthgrade classroom as part of a system of visual instruction in the meaning of conflicts of labor and capital led to a report here that the youngsters in Fox Meadow Public School were being inculcated with Communist doctrines. The report was denied vigorously by Dr. Claire Zyve, principal of the school, who explained that the posters had no more political significance than the ancient "A is for apple," used in teaching the alphabet. The Fox Meadow school ranks among the foremost elementary schools, and while some persons may consider "Das Kapital" to be beavy food for fourth-grade digestion, Fox Meadow tries to give its pupils a comprehensive picture of any situation in which they may become interested.

PHOENIX — Is trouble brewing in Washington? That is what one senses, watching from the bleachers bere in the desert. Just as a consensus grows that something must be done right away about the gargantuan def-icit, a counter-consensus emerges among the political pundits that Congress and the president will perform their usual slow waltz and maybe produce some modest budget cuts some time next summer.

Is there a quick-fix solution? Yes -a simple tax that could be enacted in a few weeks and that, with one bold stroke, would raise close to \$100 billion and halve the annual deficit. A \$1-a-gallon tax should be put on gas-oline at the pump. Here are some arguments for such a tax:

It would end America's borrowing hinge and give the economy the balance it needs to sustain the current

pace of expansion. It would protect millions of jobs that would be lost if the economy faltered. It would put the United States back on a path of living within its means, and help reduce the monstrous trade deficit. It would enable Americans to share some of our remaining oil with our children. It would safeguard U.S. national security by placing a new curb on the power of OPEC.

is such a tax fair? Japan and Western Europe answered this question in the 1970s when they enacted taxes that doubled the price of gasoline. In Europe today gasoline prices are \$2.50 to \$3 a gailon. Consumers bear this burden because it protects the economies of their countries

Is such action politically feasible?

produce big savings for them and their children in the 1990s? The writer, a lawyer and former congressman, was secretary of the interior from 1961 to 1969. He contributed this

liability. So the politics of tax reform matter immensely. The Treasury proposal is not perfect and it surely can

The Decline and Fall of Twelfth Night

ARIS — In France the Christmas holidays are centered exclusively upon food, which explains the liverish ill humor that prevails at this time of year. But even in excess, the French are people of uncommon good sense: They realize that by the end of 12 days of Christmas they are likely to feel a bit peckish again and so on Jan. 6 they celebrate Epiphany by, of coarse, eating.

Trey bave by now had oysters, foie gras, bouch, turkey, goose and buche de Noël in surfit, so on Jan. 6 they eat a relatively light cake that varies according to region but is most familiar as the flat, round galene des

MARY BLUME

rot (Epiphany celebrates the arrival of the Three Kings). The galette is made from a light pate feuilleté and comes with a paper cown worn by the person whose slice happas to cootain a feve, or dried bean, which these days is more likely to be a tiny china or pastic figure that it is better to find than to lite on.

For ages, French bakers and pastry cooks ought over who would bake the galette des vis, a matter of sufficient importance to be solved by parliamentary edict in 1713 (the pastry cooks won). During the Revolution the Fête des Rois was called the Fête des Sans-Culottes and the cakes le gateau de l'Evolité.

The Christmas season is generally jollier in Britain than in France. This is often attributed to the influence of Prince Albert and the German Weihnacht, but Bridget Ann Henisch in "Cakes and Characters" (just published in London by Prospect Books) suggests that the brief sense of harmony and faith of an English Christmas arose as an urgent antidote to the bleak misery of the period known as the Hungry Forties, (In 1843, a year after his "Christmas Carol," Charles Dickens wrote, in "The

Chimes," about the suffering in contemporary England.) And so in Britain Christmas became a time of respite, a dream of comfort and joy.

HAT was lost in England when Dec. 25 became the central holiday of the season was Epiphany, the last of the 12 days of Christmas which until Victorian times had been the rowdy height of the festive season. In England as in France, Epiphany was celebrated with a pastry—not a light galette but a concoction called Twelfth Cake which, according to the writer Leigh Hunt, looked like "the side of a rich pit of earth covered with snow."

In order to have Twelfth Night in any country, one first needed Christmas. The early Christians, connecting birthdays with pagan practices, ignored the subject of Christ's birthday. By the third century theologians had put it somewhere between March 28 and May 20. In 336, Dec. 25 had been definitively selected for reasons having

been definitively selected for reasons having vaguely to do with the winter solstice.

The season coincided with the riotous and not yet forgotten Roman Saturnalia, during which a "king" was chosen. The selection of a king remained a feature of Epiphany cele-

which a "king" was chosen. The selection of a king remained a feature of Epiphany celebrations throughout Europe.

In England, Twelfth Night became associated with masques, gambling and general jollity led by the King of the Bean, the fortunate chap who had found the bean in his piece of cake (his consort had found a pea in hers). The King was one of the Christmas season's brief stars, along with Boy Bishops, Abbots of Unreason and the Lord of Misrule. Sometimes the King of the Bean (Rex Fabarum, as he was grandly known) and the Lord of Misrule — or "master of merry disports," as an Elizabethan writer called

him — were the same.

Twelfth Night was a night of revelry and general harmless silliness which came to a sudden halt during the Civil War: In 1647 the Long Parliament abolished Christmas

and all other religious bolidays. When Christmas was restored under Charles II it had lost its easygoing spontaneity. Twelfth Night's Lord of Misrule slipped away; the cake persisted, and after its cutting cards were distributed with the names of characters (John Bull, Lady Rackett, the Spanish Patriot) whom guests were to impersonate. And so the ghastly British tradition of parlor games was born. Printed songs, sketches and cards were sold and ladies sang such spirited lines as:

I would not be Queen of the Nation, When I can be Queen of the Cake.

The cake: it was of a splendor to inspire the 17th-century poet Robert Herrick:

Now, now the mirth comes, With the coke full of phons, Where beane's the king of the sport here.

"Although the bean brought special luck to only one, the cake embodied good fortune for the entire company and, to insure a fitting correspondence between symbol and substance, it was made of the best ingredients available," Bridget Ann Henisch writes. This means it was a plum cake, or a cake full of raisins and currants, plums never having been used either in plum cake or pudding.

CHOLARS have not yet pinned down the exact date, but at some point the marzipan and plaster-like white icing essential to all English festive cakes were added. The outstanding characteristics of Twelfth Cake were its bean and its great size (in 1811 there was one 18 feet, or 5.5 meters, in circumference and nearly half a ton in weight).

There were also bun-sized Twelfth Cakes, as Boswell noted in 1763, happy in London after a grim Scottish Christmas:

This was Twelfth-day, on which a great deal of jollity goes on in England, at the eating of Twelfth-Cake all sugared over. I took a whim that between St. Paul's and the

Exchange and back again, taking different sides of the street, I would eat a penny Twelfth-cake at every shop I could get it. This I performed most faithfully."

In Genoa in 1844, Charles Dickens, whose con Charles was been on Ian 6 page the

In Genoa in 1844, Charles Dickens, whose son Charles was born on Jan. 6, was the happy recipient of a sheet of Twelfth Night characters and a magnificent cake sent from London by the weighed 90 pounds (40 kilograms) and arrived slightly dented but was repaired by a local pastry cook under the admiring gaze of most of Genoa.

ROM the mid-18th century, London had been famed in Europe for the brilliance of its shops at night. Twelfth Cakes made a particularly spectacular display, and in the 1840s and '50s the Illustrated London News devoted its columns to some of the more dazzling confections.

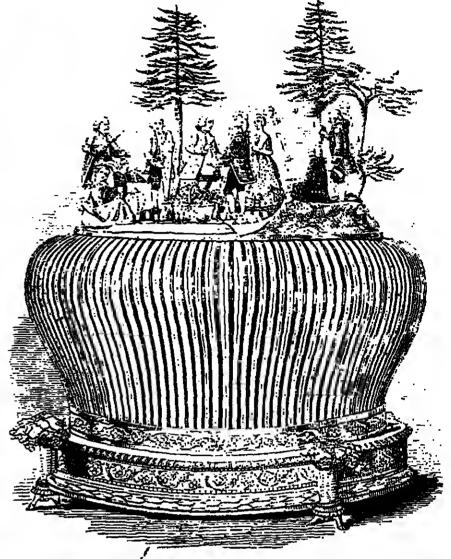

As the cakes became fancier, they became a symbol of ephemeral glory. George Meredith, comparing the British monarch to the figure perched on the summit of a Twelfth Cake, wrote: "The English middle class, which has absorbed the upper and despises, when it is not quaking before it, the lower, will have nothing above it but a ricketty ornament like you see on a confectioner's Twelfth Cake."

More solid entertainments became the base of the Victorian Christmas and by 1880, after centuries of shenanigans, Epiphany had vanished. The Illustrated London News noted that "an old-fashioned Twelfth Night party is virtually a thing of the past." Virtue

had chased out cakes and ale.

The time for riotous frivolity was over.

Christmas was no longer a season: It was reduced to one day. William Makepeace Thackeray saw it coming to the 1860s. "The tree yet sparkles, I say. I am writing on the day before Twelfth Day, if you must know; but already ever so many of the fruits have been pulled, and the Christmas lights have gone out."

From the Illustrated London News of Jan. 13, 1849.

Return of the Public Scribe

by Nell Platt

ARIS — There is a curious commuications revolution happening in
France, though it has little to do
with computers, high-speed trains
or cableelevision. It might better be called a
renaissace, for it coocerns a form of communicaen that went out of style around the
time th guillotice was invented: the village
scribe.

In les than five years, this archaic institution he made a reappearance on the French landscpe. In 1978 there were only three scribe— or ecrivains publics— in France. Todachere are more than a bundred. From a morth office suite in the shadow of the Tour fontparnasse in Paris to a hand-built woods stall in a back street of Aix-en-Provice, scribes are hanging out their shingles; ain. The French postal system is even consering a plan to station scribes in certain ost offices. In the meantime, the new scrits have formed a union, and in the best Galt tradition, an académic.

Any modern scribes differ from their anent counterparts only in that they use typeriters oow, instead of quills. Others are equipped with word processors, Xerox maches, small presses and computers. Yet the all have the same raison d'être. As one pair: "We write for those who can't — or su't."

is implausible as it may seem in a country were compulsory education has been law more than a century, the demand for thes keeps growing. There are two demo-aphic and sociological explanations to the meback of the scribe," says Michele Rerbel, president of France's national union scribes, the Chambre Nationale des Ecriains Publics. "First. France's immigrant opulation - especially from the former rench colonies in Africa - has almost Joubled since 1965: Non-French residents of France today number more than four million, or nearly 8 percent of the country's total population. The number of people who do not read or write French has grown accordingly. Nor is this simply a problem of assimilation to French culture, for many of France's immigrant workers are illiterate in their own native tongues."

But the immigrant population in France accounts for only half of the modern scribe's clientele—which could point toward a more disturbing problem, of declining literacy among the French.

"Yet this is a very different kind of illiteracy than that which the scribe had to deal with 200 years ago, when his clients were essentially ignorant peasants," Reverbel explains. "Today, even the least educated of my clients are neredibly well-informed about the vorld they live in. My clients also include recuritive, engineers, computer programners, medical technicians. What they all tave in ommon is a steady diet of audiovisual communication... and for one randier, they all find themselves frozen before a piece of paper. It's a paradoxical situation. People communicate today more than the ever have... yet they don't seem to communicate hetter."

tDAY'S scribe is an odd iokwash of past and present, of the quaint and be technologically sophisticated. In addition to writing for his clients, he — or she, to half of France's new scribes are women—often serves as a public secretarial service. They also compose resumes, do graphindesign and make calligraphed invitations and announcements. Some even write personlized poetry on demand — anything front accouplet to a minor epic. "In short, says one Paris scribe, Jacques Claustres, "anything that has to do with words and announcements to do with us."

paper as to do with us."
Yet the heart of the scribe's profession remain unchanged: The client talks, the scribelistens, then puts the client's words into aceptable written form. A session can last from to minutes to several hours. Each hour f the scribe's time costs roughly 100 franc (just over \$10) — a rate that seems evenue to some, especially as few of those

Tel. 74. 24. 24

A public scribe's shingle.

who most need the scribe's services can afford to pay his price.

"The client who knows his mind rarely

"The client who knows his mind rarely needs me for an hour," says Claustres. "Some of my clients will come in and dictate with the self-assurance of a corporate director. The whole process, from the time the client opens my door to the time I seal and stamp his letter, takes less than 20 minutes." But what about the chatterbox, the wind-

bag, the ramblet?

"It's a delicate problem," Claustres admits. "You can usually tell within five minutes whether a client knows what he needs to say or not. Often, if I sense that someone is going to tell me his life story before getting down to what he wants to say, I will gently show him to the door and tell him to collect his thoughts before coming back. Otherwise, it's a waste of my time and his money."

"On the other hand," be adds, "how can you send a stutterer or a rambler away if for him, finding a means to express himself may be a matter of life or death? I have had clients on the verge of suicide — and even murder. Because they were able, slowly, to gain the power of self-expression, they were able eventually to direct — or diffuse — their anger. If listening for an bour is what it takes to help a client see clearly what he needs to say, then it is my job to listen. If I end up accepting 10 francs instead of 100, or even a busbel of apples or a pound of chestnuts at harvest time from some of my poorer clients, so be it. You don't become a scribe to get nich, but because you love the written word, and helping people to acquire it."

and helping people to acquire it."

All of France's modern scribes seem to agree on the importance of listening, discernment, counsel. Some go so far as to talk about a confessional, or pastoral aspect. "The scribe has something important in common with the psychiatrist, the social worker, the lawyer, the priest," says

"People only come to us when they have a problem—be it material, emotional or spiritual. They depend upon our ability to listen without judging, then to keep quiet about what they have beard. Whether I'm helping someone to fill out his income tax form or to write a letter confessing a terrible crime, my ability to honor the professional secret counts for everything."

The suggestion that there may be a common ground between the scribe and the legal and social professions has provoked some suspicion. Critics charge that the scribes are unqualified lay people who have intruded upon the territory of several highly specialized professions — and who risk blurring districtions between these professions in

"It is true that we have to know several different professional jargons in order to help our clients," says Claustres. "If people are turning to us again, part of the reason is that they have become baffled by the weight and complexity of the language that an overly bureaucratized society demands of them for every official transaction.

"At the same time, I know the limits of my profession. At most, the scribe is a tool—an enlightened pen, if you like—to help the individual implement his relations with society. If my client needs legal counsel, I will be the first to send him to a lawyer. If, however, as an informed layman I know that my client doeso't oeed a lawyer to fight his parking ticket, to claim his unemployment benefits, to sell his house without an agent, I will be the first to help him act independently."

What the scribe calls independence, his critics have often called disruptiveness. A French edict of 1774 reads: "It has come to our attention that there is a considerable number of so-called public writers in our cides, and that their scribblings incite suspicion, jealousy and public disorder. ... We therefore forbid the said scribes to write, compose or copy any letter, sign, poem, song or pamphlet against the church, the government, the king, good manners or the general order of things."

"Even today," Reverbel says, "society is often ambivalent toward us. People admit that someone bas to do what we're doing, yet they are wary of us. But then, the scribe bas always been a threat to the established order of things: He gives the power of speech to those who don't have it; he enables people to stand up for their rights."

This may be true, bot can scribes possibly hope resolve the problem of self-expression in an increasingly complex world?

"Of course not," says Claustres. "The ultimate solution is to rekindle a love for writing in our clients, and not just to write for them. Courses in French for immigrants are needed throughout the country, as well as a new emphasis on the instruction of reading and writing from the elementary school level onward."

NOTHER factor is the increase in communication worldwide within the business and intellectual communities. One of Claustres' best clients is the head librarian at a campus of the University of Texas who has to deal with French publishing houses and universities. "His spoken French is good, but it takes him too much time to write a good French business letter. So he writes his letters in his spoken French and sends them to me, then I polish them up. I think more and more of the modern scribe's work will be along these lines in years to come."

"The modern scribe has adapted to the modern world," Reverbel adds. "However, a large part of our work will necessarily remain 'traditional.' The sad truth is that no matter what weight the French school system decides to give to basics of reading and writing, our present society does very little to encourage people to write once they leave school. Why write when you can pick up the telephone?"

In late 1982, Reverbel carried her vision and her inkpots out into the streets of Valence, the city in the Rhone Valley where she practices her trade. For three months she set up shop in every quarter of her city and invited people to write. Her experiment produced thousands of anonymous stories, essays, graffiti, poems, statements and aphorisms.

"In spite of my pessimism about the future of the written word. I am hopeful. I have learned that most people, given a piece of paper and a pencil and especially a little encouragement, begin to discover that they can write. They they begin to play. Then they begin to see the incredible power of creativity that writing can give them."

Last year, Reverbel published her collection of writings, in what may be the first document about the revival of the public scribe. As a title for her book, she chose one of the pieces in her collection: the brief, hesitant statement of an anonymous hand:

"I write... because no one will listen."

Tuning Up the Concert Hall

by Harold C. Schonberg

EW YORK — The specter of concert-hall electronics cootinues to haunt those who believe that God intended concert halls to be made of wood and plaster, unsulfied by loudspeakers, transistors and delay systems. Acoustic fundamentalists see in modern acoustic technology the death of pure sound, murdered by the devils who tamper with natural law. And the chief American devil in their eyes is a cherubic-looking gentleman camed Christopher Jaffe, the bead of Christopher Jaffe Associates in Norwalk, Coonccticut, who already has electronified about a dozen halfs and is planning more.

a dozen halls and is planning more.

Recently the acoustic fundamentalists started worrying and fretting even more than usual. On Oct. 12, the Indianapolis Symphony gave its first concert in its oew home—the Circle Theater, a 1916 movie bouse that was acoustically touched up by Jaffe. And once again the issue was joined: do electronics bave a place in an auditorium dedicated to "pure" sound? Even more: what positioo can the fundamentalists take when the re-

sulis turn out to be successful?

For there could be no denying that Jaffe bad used his electronic system to create an admirable acoustic. Even under the big balcony overhang, where sound can rattle around and get lost, definition and color were maintained. Nor was there any loss in volume. Jaffe's previous ventures in electronic halls had not pleased all listeners. In Eugene, Oregon, several years ago, his installation sounded great when the hall was empty and not so great with people in it. (He says that the problem has since been worked out.) This time there could be no arguing with

Jaffe has installed in the Circle Theater his ERES network. ERES stands for Electronic Reflected Energy System. It is intended to improve a half's deficient reflected energy—and those two words, reflected energy, are manic words among today's acousticians.

magic words among today's acousticians.
Years back, the magic words were "reverberation time." Roughly speaking, reverberation time is the time it takes for a sound field's intensity to decay by 60 decibels. It is measured at various frequencies. A concert hall with a reverberation period of between 1,8 to about 2.2 seconds at 500-1000 Hz (cycles per second) was automatically considered, ipso facto, a good hall. But in recent years it was found that some new halls with "perfect" reverberation times were not, after all, so perfect. Something was missing.

Now it is believed that the answer may be in reflected energy.

N any concert hall the ears receive sound from two sources: direct from the stage, and reflected off the walls and ceiling. Many modern acousticians — and laffe is a very modern acoustician — claim that the major secret of a superior concert hall has to do with optimum arrival times of early and late arriving energy fields.

Middle and high frequency energy fields (250 Hz and over) should hit the ears within 20 and 30 milliseconds. Low frequency sounds (250 Hz and under) should arrive later, after 30 milliseconds. The correct arrival of middle and high frequency sounds gives a hall its presence, brilliance, definition, transparency. The correct arrival of low frequency sound takes care of warmth, bass response, low string balance. The famous old concert halls achieved correct arrival time by the use of wall and ceiling surfaces. But no architect today thinks in terms of old halls, with their niches, statuary and other gewgaws that helped diffuse the sound. Modern halls are, well, more "modern," simpler in design, more antiseptic. Thus the acoustician has to work with systems of sound reflectors—baffles, overhead "clouds" and the like. It's a complicated subject, and the busy Jaffe is never too busy to expound for hours on it. Heavyset, bald, vofuble, intense, a

natural salesman, a man with a wry sense of

humor, a passionate proselytizer, Jaffe is a

largely self-taught acoustician and is considered a maverick in acoustic circles. He is

constantly on the move. Where most acousticians do 20 or 30 halls in their lifetime, Jaffe already has had his hand in 100 or so installations, from concert halls to multipurpose halls, from outdoor shells (where he made his first reputation) to sound systems in board rooms. Anything to do with sound comes under his province.

Yet he drifted into his work by accident.

Born in Brooklyn in 1927, be got a degree in chemical eogineering from Rensselaer Polytechnic Institute, then went to Columbia University to work in drama and theater. For a while he did theater work and design. Then he designed an acoustic shell for Boris Goldovsky's New England Opera Theater, after which be formed a company that specialized in shell design. Major commissions came from the Cincinnao Symphony, New York Philharmonic, the White House, the Metropolitan Opera and other illustrious organizations.

In 1964 he designed his first theater, the pavilion for the Meadow Brook Music Festival. It was an acoustic success. Since then be has dooe halls from Mexico to Canada, most recently — in addition to the Circle Theater — Boettcher Hall in Denver and the Silva Concert Hall in Eugene. On the drawing board are halls in Anchorage, Alaska; Houston; Columbia, South Carolina; Fort Myers, Florida, and San Antonio, Texas.

Jaffe argues vehemently that his ERES system is nothing more than a tool, used to correct conditions in already existing halls, or in new multipurpose halls that could oot possibly work without electronic support. When he has his hand in an orthodox concert hall designed from scratch, he sees no reason to use his ERES system. But when there is no alternative — when he is called upon to work on an old movie theater, or a

Christopher Jaffe believes that with today's new electronic tools 'it is possible to duplicate the great halls of the world.'

multipurpose hall that necessarily must be a compromise — he has no hesitation calling upon whatever electronic means are necessary to correct an otherwise insoluble situa-

in any case, he says, the kind of electronic systems represented by the one in London's Royal Festival Hall or the halls into which ERES has been placed, are as much "natural" parts of the halls as the side walls and reflective surfaces of Carnegie Hall or Symphony Hall in Boston. That is, these electronic systems are not like Broadway amplification, in which audio engineers are constantly riding the controls. Once installed, they are, instead, natural properties of the halls, not to be tinkered with. (The Circle Theater system has only two settings—on and off.) They do not amplify sounds. They merely change the acoustics, doing so electronically rather than mechanically. They are intended to do for concert halls what the "clouds" or other gadgets do for excheder concert halls or other approach.

orthodox concert halls or opera houses. Yet despite all the electronic ingenuity of the last few decades, what has been the result? The fact remains that where the period from about 1860 to 1910 saw the erection of many great concert halls throughout the world (the three greatest are conceded to be the Musikverein in Vienna, the Concerteebouw in Amsterdam and Symphony Hall in Boston), the post-World War II period seems to have seen one acoustic disaster after another. The word "acoustics" suddenly became famous in the United States after the failure of Lincoln Center's Philharmonic Hall (now Avery Fisher Hall) in 1962. But the New York hall had been preceded by the acoustic failure of the Royal Festival Hall in

. 3

The latter solved its problem with the installation of an electronics system that supplied a bass response where previously there had been virtually oo bass. Philharmonic Hall was gutted and rebuilt. Since then there bas been a plethora of concert halls and opera houses in the United States, thanks to the proliferation of performing arts centers starting in the 1960s. But very few of them have been greeted with cheers by the experts. Is something wrong with the science of acoustics? Or is the so-called science of acoustics something akin to magic, or succession, or the reading of tarot cards?

AFFE has an answer to this, too. "Of course acoustics is a science," he said recently in his Norwalk office. "What happened after World War II, and especially after the arts center boom, was the multipurpose hall. Sure there were lots and lots of new halls. But very few of them were built specifically as a concert hall or an opera bouse. They were big multipurpose halls, intended to contain all kinds of music opera and symphony, recital and jazz, touring shows, everything. The thing is against all laws of physics. An opera house needs a short reverberation period, like 1.2 or 1.3 seconds. A concert hall needs 1.8 to 2.2 seconds. How can one hall do both? The multipurpose hall had to be a failure from the beginning."

Jaffe pointed out that fewer than a dozen real opera bouses or concert halls have been built in the United States since 1962, the year that Lincoln Center sparked the performing arts center craze. There have been Philharmonic Hall (Fisher Hall), the Metropolitan Opera, the two Kennedy Center halls, the concert halls in Minnesota, Salt Lake City, Denver, San Francisco and Baltimore. Otherwise bundreds of multipurpose balls around the country were put up. Few cities could afford the huxury of separate concert halls and opera houses. So the communities built multipurpose halls, intended as a recep-

"Acoustics got a bad name because of those multipurpose halls," said Jaffe. "There was also the trend for symphony orchestras to go into restored movie houses. But it is not generally realized that many of those are being used as multipurpose halls. In Europe there also were many multipurpose halls. Some of them were a mess."

DUT, according to Jaffe, there is hope. Thanks to the tremendous advance in acoustic science in the last quarter of a century, thanks to the invention of measuring instruments infinitely more sophisticated than they used to be, thanks to some remarkable research on the nature of hearing, thanks to oew electronic techniques—thanks to all this, acousticians can approach the problem of the multipurpose hall with a fair degree of confidence.

So says Jaffe. And more. He looks you in the eye and states with calm certitude, as a simple matter of fact, that with today's new electronic tools "It is possible to duplicate the great halls of the world."

It is a statement that his fellow acousticians receive with a certain amount of reserve. The world of acoustic specialists is small and inbred, and few of them will say anything for publication that is adverse about a colleague. (Privately—that is another matter.) Thus several acousticians who were confronted with Jaffe's statement refused to be quoted by name. But their responses varied from an explosive "Nonscise!" to less printable observations. Jaffe, who is a Fellow of the Acoustical Society of America, the Audio Engineering Society and the Institute of Acoustics (United Kingdom), obviously still remains a maverick to his fellow acousticians.

Yet it would be interesting if the sponsors of a projected concert hall or opera bouse came to Jaffe and said: "All right. Make me a Musikverseinsaal. Make me La Scala."

A Guide to the 1985 Travel Guides

by Paul Grimes

EW YORK - Already it is 1985 - in the travel sections of bookstores, anyway. Their shelves are brimming with 1985 editions of popular "meat and potatoes" guidebooks that list what they regard as the best hotels, restaurants, entertainment, shops and sightseeing attractions.

Many publishers say that their books are substantially overhauled annually, others that revisions are undertaken at least every two years. But, in fact, even the latest editions may have few changes from last year's, except in prices for meals and lodging and a few additions and deletions. For example, restaurants will appear - and disappear. As Stephen Birnbaum, editor of the series bearing his name, put it, "The truth of the matter is that the history of Europe doesn't

change. Most publishers say they frown on their contributors' accepting free travel from in-terested parties such as airlines and hotel companies, and some say they pay all or much of the travel costs involved in gathering and revising material. Often, however what a writer or researcher pays in travel expenses must come from the royalties or fee for his or ber work. "We discourage them completely about taking any freebies," said Paul Pasmantier of Frommer/Pasmantier Publishers. "It could affect their objectivity. But if I had to swear on a Bible that they do or don't - you know, I'm not with them all

vey was on series that stress general travel information plus facts about essentials like food and lodging that are subject to substantial change. It was not on guidebooks such as the Nagel, Blue and Michelin Green series, which concentrate oo culture, history and sights.

Fodor's Travel Guides

This series, which will have more than 100 titles in 1985, began when Eugene Fodor published his first guidebook to Europe in 1936. He sold the business in 1968 to the David McKay Co., the New York publisher, but it is still operated as a separate company, although one person, James Louttit, is president of both.

More than 300 people, who live in the places they cover and work on a fee basis, feed material into one of Fodor's two editorial offices, in New York or London. The staffs there lay out the books in a uniform style. "It's formula stuff," Loutut said. "We do not believe as a rule in single-authored books because with them you're getting one person's point of view. You can't send a person to Paris and have him do a guidebook in a month. That's why we use people living

Louttit said from 40 to 80 percent of the pages in a book were corrected each year, even if only by one word. About every four years, he said, "We totally revise the book."

undergone substantial revisioo. Eunice Riedel, the Morrow senior editor most closely involved with the series, said "Fielding's Europe," the big brother of the series, is being totally rewritten by Joseph Raff, the current author. "A good third is new in the 1985 book," Riedel said, "because be didn't finish last year. I don't think he'll ever finish, because we're trying hard to keep things up

Each Fielding book is substantially differ-ent from the others, she said, because each is essentially the work of a single author or husband-and-wife team, in addition to whatever researchers they employ. "We try to stick to the same format," she said, "but each country is different, lo Mexico, for example, there are a lot of handicrafts, so we talk more about them than we might in another book. We also will talk about places worth seeing in Mexico even if the hotels aren't so hot. but in Europe we'd stick to places with good

Arthur Frommer Guides

Frommer/Pasmantier Publishers, a division of Simon & Schuster, publishes several series of guidebooks, the most popular being Europe on \$25 a Day and its various clones aimed at the budget traveler, as well as the "Dollarwise" line for the more affluent. Arthur Frommer personally writes only the Europe book, which was "on \$5 a Day"

when he began it 27 years ago.
Only the Europe book is revised annually. Since Temple Fielding, the founder, died in 1983, the 14 Fielding titles, published by William Morrow & Co. of New York, have 50 percent every other year. "Each book is

I DIDN'T MEANIT

researched and written by one person or husband-and-wife team." he said. "We don't feel that a committee of free-lancers in Paris can send in memoranda to editors and come up with the best way to do a travel book."

"Generally our writers don't live in the country," Pasmantier said. "They are all Americans. We want our books to have an American point of view for the American traveler. But many have lived there and spend months over there in their research."

Stephen Birnhaum Travel Guides

Stephen Birnbaum is a writer, editor and broadcaster with a large supporting staff. The backbone of his operations is Diversion Communications, of which he is editorial director, it publishes several lucrative leisure-oriented magazines aimed at special audiences, such as physicians, and has 72 permanent editors and art people.

The six-member staff in New York that puts out his 13 guidebooks deals with about 400 revisers and other free-lancers in the field. Their input is supplemented by material gathered for the Diversion magazines. "We may do more than two dozen Caribbean-related articles for Diversion," Birnbaum said. "For example, we just did one on private islands. The idea was inaugurated and paid for by Diversion, then adapted into guidebook style and included and homogenized into our Caribbean book. The budget for such a story, involving travel and time at a dozen resorts, is as much as the normal revision budget for our entire Caribbean

SEAUTY SOAP

This series of 10 budget guidebooks is completely researched, written and edited by Harvard University students through the Harvard Student Agencies. The publisher is St. Martin's Press in New York. The staff changes substantially every year. For example, Mark Fishbein of New York, who recently completed a year's managing editorship, has graduated from Harvard. Fishbein, 22, joined Let's Go in his fresh-

man year as a researcher oo Italy. ("I grew up there," he said, "and speak Italian fluently.") Thirty-six researchers are recruited in the spring and given intensive training by the editors using a special handbook. An itinerary for a specific country or region is planned for each researcher. Each spends the summer in the field, updating information

and looking for what's new. Periodically each sends reports home to six editors and six assistant editors, who put the books to-

Fisher Annotated Travel Guides

This expanding young series of guide-books, edited and annotated by Robert C. Fisher, currently has 22 titles. "For each book, I hire someone — or a couple — who is already an expert on the subject." Fisher said. "I give them an outline of our minimum requirements and I tell them to use artistic license oo the rest. I doo't rewrite their material. I devised annotation in the margins to get my viewpoint across. The annotations are my way of putting my imprint on the individual work of the authors."

Actually, the Europe book has a compendium of authors because it embraces so much. "I travel extensively and read ente-

sively and keep up with what my writers as doing." Fisher said. "And I do have we power. I do trust the authors' judgment by sometimes I have to disagree with what the are doing

American Express Pocket Guides

These 12 guides to selected European countries, regions and cities plus Nest York and California are also worthy of note they were produced this year in London and distributed in the United States by Shall & Schuster. Each book, credited to one against and several contributors, includes enterent maps and has substantial assistance from editors and writers of Trave and Labour magazine. Whether new editions will time out in 1985 is currently uncertain.

TRAVEL

What's Doing in Athens

by Henry Kamm

THENS — The Greek language can be heard again in the hills of the city and the halls of the museums — the tourist seasoo is over. From the until Easter, the Acropolis can be visited who have come to marvel at their hetage, with not a camera poised to record the visit; the Poseidon of Artemisioo is evi more splendidily commanding when be des not gaze down on a Naconal Archaeolocal Museum abustle with tour group manbers looking for their leaders or parents spaking in many tongues trying vamly to covioce their offspring that this excursion we worth giving up a day at the beach.

here is a price to be paid for such splendisolation. The winter months are not the gly of Athens. Cold winds blow, and rainy das are frequent. Evening entertainment of the beyond dinner in a laverna and tevision in the hotel. No sound and light shw at the Acropolis, and few nightly folk-dacing performances.

but in a country whose biggest iodustry is torism, one in which just about every tour stits in the capital, an Athens winter is not tobe scorned, particularly for those who be already explored the city and its surrandings under a summer sky and want to reesh and deepen their memories with feweintrusions from other visitors.

Winter is the time when Plaka, the oldest inabited section of this ancient city of legely modern houses, loses its tourist-trap flyor, and its essential nature becomes visi-

Plaka is roughly the area between the hights of the Acropolis and the bustle of Constitution Square, also known as Syntama Square, the heart of modern Athens. The district is built steeply up the hillside, aid its streets are often little wider than odinary stairways. It is a warren of alleys, flights of steps, small squares, maoy churches, some Roman ruins, Turkish mosques and above all shops, tavernas and coffeehouses. In its winter mode, Plaka's normal life, conducted for the most part alfresco, moves indoors in the evening.

Taverna tables no longer fill the sidewalks, and on some evenings one can even find a table at Xinou (4 Angelou Yeronda Street; tel: 322.10.65), the best of the tavernas, Most of the year the surly but talented owner refuses even to accept telephone reservations. Xinou offers what most tavernas offer, only better. The appetizers, which can make a meal by themselves, inclode taramosalata, a pink whip of fish roe and olive oil; meltizanosalata, a rich paste of eggplant; tratsiki, a mixture of thick yogurt, cucumber and garlic; marinated squid; large stewed beans, vegetables and Greek salad of lettroe, tomatoes, olives, onions and feta cheese.

If your appetite survives this course, entrees of grilled meat and fish and a variety of stews will see you through to the next evening's meal. At the present rate of exchange, a meal for two, including wine, is about 3,000 drachmas (\$25). Although service is included, a tip of 350 to 600 drachmas will be appreciated. The bonse minstrels accept 100 or 200 drachmas as their due, particularly if they have serenaded you at your table.

In the plethora of Plaka gift shops, at least two stand out for the taste and originality of their offerings. Elliniko Spiti, at 14 Kekropos Street, specializes in fine examples of old folk art from throughout Greece and its islands. Oo sale are painted and carved ehests, some in their original state, others made of salvaged panels of old woodwork. Prices are fairly firm, and a chest can cost about 25,000 drachmas. Lekythos, at 75 Adrianou Street and 39 Kydathineon Street, sells handmade jewelry of original design, largely derived from antique pieces. Brooches cost about 3,000 drachmas, earrings 2,500. Similar pieces are available at far higher

prices at Lalaounis and Zolotas, two luxury jewelry shops oo Panepistimion Street, off Constitution Square.

In the portion of Plaka between the tourist quarter and the Acropolis lie sections that could have been transplanted from the countryside — villagelike clusters of oeat, freshly painted houses surrounded by gardens, narrow and winding alleys, churches, such views of the city below as smog permits and considerable peace and quiet in a city remarkable for its punishing traffic. Continue strolling until you reach the height that offers you the Parthenon, the Erechtheion and the marvelous view from the Acropolis down on the Odeon of Herod Atticus, in the characteristic form of a Roman theater.

what he has gathered for viewing remain essential stops on any visit to Athens. The Acropolis is open daily from 9:30 A.M. to 4 P.M., Sunday from 10 A.M. to 3 P.M., closed Tuesday. Moonlight permitting, its grandeur is visible at might as well. An unexpected pleasure of Athens is stopping almost anywhere in town to see if the Acropolis is visible from where you happen to be. It can be seen remarkably often and from angles that offer surprising impressions.

The Arch of Hadrian, dating from A.D. 132 and thus a relative oewcomer compared to the 2,500-year-old monuments of the Acropolis, can be visited at any time. The arch survives the brutal and polloting traffic of Amalia Avenue, one of the city's busiest thoroughfares. The Roman Emperor Hadrian was also responsible for the completion of the adjoining Temple of Olympian Zeus, whose great Corinthian cohumns, in their ageless elegance, contrast keenly with the modern city around them.

The ancient Agora is second only to the Acropolis as the city's most popular classical site. A particular attraction on the site is the Theseion, considered the best-preserved Doric temple in the world. The bours are the same as those for the Acropolis.

Also worth a visit are four small Byzantine churches in central Athens, all currently in use. Dating from the 11th and 12th centuries, they are the best preserved architectural reminders of the impact of Christianity on Greece. The four are Ayioi Apostoloi, or Church of the Holy Apostles, oear the Stoa of Attalos in the Agora; Kapnikarea, on Ermon Street, a shopping strip; Ayios Eleftherious, which is dwarfed by but outshines the featureless modern cathedral on whose square it stands, and Ayioi Theodoroi, on Klathmonos Square.

First among Athens museums is the National Archaeological Museum, 1 Tossitsa Street, and impressive collection of classical Greek art in all its manifestations. But because of the scope of its offerings, the museum can be numbing to visitors who begin by inspecting everything along their path and reach its greatest glories no longer capable of absorbing them.

A better approach would be to plot a route with the help of the handsome illustrated

guide (oo sale in the lobby), following a sense of pleasure rather than the strictures of educational duty. The museum is open week-days from 9:30 A.M. to 4 P.M., Sunday from 10 A.M. to 3 P.M., closed Monday. Dress warmly; heating is a mere suggestion.

The splendors of Byzantine art are on display in the Byzantine Museum, 22 Vasilissis Solias Avenue, which houses an important collection of early Christian, Byzantine and post-Byzantine sculpture, icons and frescoes. The museum is open daily from 11 A.M. to 3 P.M., closed Monday.

Also of interest are the Museum of Greek Popular Art, 17 Kydathineon Street (open daily from 10 A.M. to 2 P.M., closed Monday, admission free) and the edectic private collection in the Benaki Museum, oo the corner of Vasilissis Sofias Avenue and Koumbari Street (9 A.M. to 3:30 P.M. weekdays, 10 A.M. to 3 P.M. Sunday, closed Tuesday). The National Picture Gallery, opposite the Hilton Hotel, offers a good survey of contemporary Greek art. Open daily from 9 A.M. to 3 P.M., Wednesday from 9 A.M. to 8 P.M., Sunday from 10 A.M. to 2 P.M., closed Tuesday.

OR the price of a cup of coffee, you can watch modernity in full cry and at full speed on a short stretch of E. Venizelos Avenue. Here you will find Zonar's and Floca's, the two famous cafes whose sidewalk terraces merge one block from the corner of the Grande Bretagne Hotel, on Constitution Square. Greeks of all ages rush by. At the tables sit members of Athenian society of an earlier, more placed age.

Less well known is the café called Orfanides, a set of small tables at the opposite corner, oearer the Grande Bretagne. Here only cold drinks are served — ouzo, beer and sodas — along with small servings of ham, salami and cheese. A snack that takes the place of lunch is about 250 drachmas.

Top hotels, offering an international atmosphere, include the Grande Bretagne (Constitution Square, 10563 Athens; tel: 323.05.21), the N.J.V. Meridien (Constitution Square, 10564 Athens; tel: 325.53.01), the Athens Hilton (46 Vasilissis Sofias Aveoue, 10676 Athens; tel: 722.02.01) and the Athenium Inter-Continental (89-93 Syngrou Avenue, 11745 Athens; tel: 902.36.66). The first two are in the center of the city; the others are less centrally situated. In these totels, a double room starts at about 11,000 drachmas, a single at about 8,750 drachmas. At large hotels such as these, rates are the same throughout the year,

The St. George Lycabetrus (2 Kleomenous Street, 10675 Athens; tel: 729.07.11), a modern, well-appointed establishment, commands fine views but requires a bit of climbing or finding a taxi, not always easy in this city. A double room, including breakfast, is about 5,000 drachmas, a single about 3,750 drachmas.

Plaka offers two pleasant hotels at modest cost. Possibly the best hotel bargain in Athens is the Nefeli (16 Hyperidou Street, 10558 Athens; tel: 322.80.44), with 18 rooms. In winter, a double is about 1,750 drachmas, a single about 1,350 drachmas. The Acropolis

Modern Athens from the Acropolis.

House, (6 Kodrou Street, 10558 Athens; tel: 322.23.44), a family-owned establishment that is older and simpler, offers singles for 750 drachmas, doubles at 1,000 and triples at 1,900. High season rates rise sharply.

Greek food reflects the influence of Turkisb cuisine, and the food served at Greek restaurants and tavernas is similar to Greek home cooking. Two Greek dishes that are standard in every restaurant are moussaka, which is composed of layers of eggplant and ground beef topped by bechamel sauce, and pastitsio, a similar dish in which pasta is substituted for eggplant.

Another Greek speciality is gemistn—vegetables such as tomatoes, zucchini and vine leaves stuffed with rice and ground beef seasoned with berbs, in a tomato or egglemoo sauce. Meat is often served grilled, roasted or in casseroles with potatoes, rice or vegetables like okra, green beans and onions. The menu always offers pork chops and bifteki, like hamburger only tastier.

In addition to tavernas, whose menus follow traditions that never vary, Athens offers a good choice of eating places. There is little disagreement with the consensus that the best restaurant continues to be Gerofinikas (10 Pindarou Street, near Coostitution Square; tel: 362.27.19). A restaurant that specializes in regional dishes, it offers taverna-type appetizers in greatly refined form, as well as meat or fish on skewers, grilled meats or fish and stews in aromatic sauces. A meal for two, with wine, is about 3,000 to 4,000 drachmas. Reservations are essential.

For good French cuisine, try the Brasserie des Arts of the Meridien hotel. Reservations are advisable. At Le Grand Balcon, the top-floor restaurant of the St. George Lycabetus, the food is good — and the view spectacular, for the hotel is on the slopes of the highest hill of Athens, overlooking the entire city, the sea and some islands. At both, dinner for two with wine is 3,000 to 4,500 draches.

Far more modest in setting and menus are two other restaurants near Constitution Square, Corfu (6 Kriezotou Street; tel: 361.30.11) and Kentrikon (on a small plaza reached through 3 Kolokotroni Street; tel: 323.24.82). Both serve good food in a relaxed atmosphere that will not be unfamiliar to habitness of New York delicatessens. Even if you choose the costliest items in the menu, it would be difficult to spend more than 1,250 drachmas a person at either place.

Concierges at Greek hotels are exceptiously helpful. Though it is oot customary to tip them, you may want to leave 500 or 600 drachmas for a particularly attentive concierge upon your departure.

The main office of the Greek National Tourist Organization is at 2 Amerikis Street (tel: 322,31.11). The tourist office also has an information desk at the National Bank of Greece, 2 Karageorgi Servias Street, on Constitution Square (tel: 322,25.45 or 323,41.30).

Defending Real English Cheese

by R.W. Apple Jr.

SAT

TREATLEY, England — Patrick Raoce, crusader for farmhouse cheese, was incensed as he told his latest bureaucratic horror story. The Milk Marketing Board, he said, had almost done it again: Using its power to set milk prices, it had very nearly obliged the Tuxford & Tebbutt creamery in Melton Mowbray, Leicester, to abandoo the production of Leicester cheese.

Had that happened, he exclaimed with a fine show of indignation, there would not have been a single producer of the traditional deep-red 45-pound wheels of rich, sharp, close-grained Leicestershire left in the county of its birth.

Such things matter to Patrick Rance, a 66war-old shopkeeper and authority on the subject who has loved the hard cheeses of England sioce he was a child growing up in an Anglican rectory in the East End of London. For more than two decades he has campaigned, often almost single-handedly, to reverse the trend toward what he considers characteriess factory-produced cheese whose soapy flavor and texture bear little resemblance to farm products.

Rance is convinced that at least part of the British public agrees with him. He cites a consumer survey's finding that 2 of the 17 British food chains sell such poor cheese that half the customers who enter the store to buy cheese refuse to do so and that 7 other stores experience the same reaction from a fourth of their customers.

"The supermarket destruction of English cheese has got a lot of people discontented — a lot of people," Rance said.

But the tide toward uniform blandness continues. The cheese that he calls "our most original gift to humanity." Cheddar, is available to most people, Rance says, only in the form of "some hard-pressed rectangular substitute, often foreign, usually emasculated in character and chilled into irredeemable immaturity." Only 11 farms in southwestern England, where Cheddar originated, still make old-fashioned cheeses.

In his detailed study of the subject, "The Great British Cheese Book" (1982), Rance calculated that there is only enough real Cheddar to put it on two out of every 300 British tables where cheese is eaten.

A visitor from the United States, con-

fronted with the real thing—a slice of langy, dryish, well-aged farmhouse Cheddar that in some ways resembled a slightly immature Parmesan—confessed that it tasted nothing at all like the English. American or Canadian products she had been eating all her life. Most English people react the same way when they first taste a cut from a proper cylinder of Cheddar.

The same is true of Cheshire; of Swale-dale, one of the best of the Yorkshire cheeses, now made on only two farms, and of many others. Still others, like Dorsei Blue

Vinney, have disappeared.

In their place new English cheeses are appearing. The pioneers are people like Hilary Charnley, a young farmer in Devon who makes an herbed cheese called Devon Garland and another, plainer type called Warkleigh, Most such cheeses are not widely

The place where nearly all can be bought, not surprisingly, is Rance's shop. He has

Patrick Rance and some wares.

spent years traveling the country, sniffing out new producers, encouraging them, selting their cheese and encouraging others to do

His place of business is an anonymouslooking building here in Streatley, a quiet village near Reading and a few miles up the Thames from Henley, site of the regarta. The name, Wells Stores, is almost invisible in foded letters on the froot. About a third of the space is taken up by the amiable clutter of a thousand such shops. "We do a nice line in tinned soups and we're not too bad in boot laces," Rance said. But the rest is crammed with cheese, which accounts for 80 percent of sales.

BiG, small, French, English, smelly, mild. orange, white, soft, hard, jostiliog one another for space on shelves and counters, the cheeses are displayed and labeled io delightful, unruly profusion. Several hand-lettered signs encourage shoppers: "Please ask for a taste."

"Please ask for a taste."

More than 60 of the cheeses are English and most are hard, although there are some excellent softer ewe's and goat's milk cheeses. Hard cheeses, Rance said over a sampling of six or seven of them, were developed in England because winters are barsher than in France or Italy and cheeses had to be kept a good deal longer.

Nowhere else is such a variety of English cheeses available, although Rance praises two London shops — Neal's Yard and Paxton & Whitfield — for their efforts to keep the flame huming. He sells to private customers, to mail-order clients and to about 25 of the best country restaurants in southern England and Wales.

Most shops in England count themselves lucky to have one farmhouse Double Gloucester in stock. Wells Stores has three, and o rare and delicious Single Gloucester too. Single Gloucester is only about half as thick — two to three inches, or 5.5 to 7.5 centimeters — and two-thirds the weight — about 16 pounds, or 7 kilos — of Double Gloucester; it is eaten when about six weeks old, while Double Gloucester is ready for the table after six months to a year.

Most days Wells Store, named for the family that founded the business in the 1830s, offers four or five Cheddars and half a dozen English goat cheeses. Equally well represented is the regal Stilton, blue-veined with a pehbly consistency, one of the few English cheeses whose production is limited to a single area.

Rance and his wife, Janet, came to Streatley 30 years ago. He had retired from the army as a major after serving in Italy during World War II and had done a stint in opinion research at Conservative Party headquarters. They moved because they wanted to live in the country and raise their seven children there, not because they had any notion of getting into the cheese business. It all happened because parents and children wanted "real cheese" for themselves, Rance said, "not because of any business sense or foretheasely or serving."

forethought or genius."

A stocky, handsome man who likes denim work shirts, he must be one of the few shopkeepers who wear a monocle on a black cord around the neck. It seems an appropriately mild eccentricity for one whose passion is cheese and who eagerly discusses its more areane aspects with all corners.

9 1984 The New York Tunes

Our exclusively-designed leather pocket diary is thin, flat and elegant.

No sooner was it introduced than everybody wanted one!

The International Herald Tribune diary started as a distinctive Christmas present for a few of our friends, was such a huge success that now we make it available to all our readers.

This ingeniously designed diary is flat as can be—neat and luxurious—including a built-in note pad. Slips into your pocket without a bulge and is ready with instant "jotting" paper the second you need it. Personalized with your initials (up to 3) at no extra cost. The perfect Christmas gift for almost anyone... including yourself.

Note paper sheers are fitted on the back of the diary—a simple pull removes top sheer.

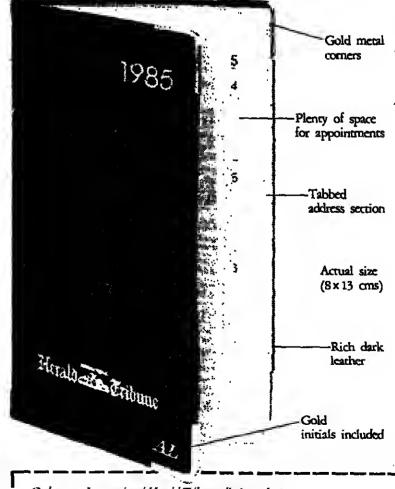

No curled up edges. No torn

— Comes with note paper refills.

— Format: 8x13 cms.

PLUS: Pages of useful information.

Conversion tables of weights,
measures and distances, a list of
national holidays by country, airport
distances, vintage chart and other
facts... all in this incredibly flat little
book.

NYSE Prices Decline Again

NEW YORK - Prices oo the New York Stock Exchange gave ground Thursday in a sluggish year-end session marked by selling pressure on some toy-manufacturing and retail-

ing issues.

The Dow Jooes average of 30 industrials dropped 6.40 to 1,202.52.

Volume came to 70.10 million shares, down from 46.70 million Wednesday. Toys 'R' Us, a company with a wide follow-

ing on Wall Street, reported a 16.9-percent sales gaio for the eight weeks ended Dec. 24. It said the increase was "below our aggressive sales plan" for the holiday selling season.

Io a letter to shareholders, company execuives attributed the development to a drop in sales of video games and home computers. Toys 'R' Us stock tumbled 7% to 40 and led

the active list on volume of more than 2.5 million shares. Selling spilled over into some other retailing issues, and toy makers as well, although Toys 'R' Us said its sales of "traditional" toys remained strong through the holiday period.

Among retailers, Wal-Mart Stores dropped 1/2 to 39, and Petrie Stores 21/2 to 331/4. Petrie owns about 13.4 million shares, or about 25 percent, of Toys 'R' Us. In the toy manufacturing group, Tonka fell 3 to 414; Mattel 1/2 to 10%, and Hasbro Bradley,

traded oo the American Stock Exchange, 51/4 to

The toy makers' stocks have been among the best performing groups in the market this year. Toys 'R' Us, for its part, has become something

Div. YIL PE 100s High Low Quet Chine

of a legend on Wall Street as a classic turn-around story.

Its predecessor company, Interstate Stores,

spent several years during the 1970s in bank-ruptcy proceedings. After it was reorganized under its new name in 1978, its stock began a climb from 1% (adjusted for subsequent splits) to a high of 52% this year. Otherwise, analysts said the mood among

money managers at investing institutions was very subdued. The performance of the market in 1984 has disappointed many people after the large gains recorded in the two previous years. Furthermore, many portfolio managers have had trouble this year producing results as good as the market averages — in part because small-er stocks that do oot carry much weight in the indicators have fared even more poorly than the

big-name bloe chips. The U.S. government is expected to sound an upbeat note for the 1985 economy when it reports Friday on the index of leading economic indicators for November. However, a strong showing by the index has been widely forecast, and may already have been taken into account by the market

In the daily tally oo the Big Board, declines outpaced advances by about 3 to 2. The exchange's composite index lost .40 to 95.64. Nationwide turnover in NYSE-listed issues,

including trades in those stocks oo regional exchanges and in the over-the-counter market. totaled 86.62 millioo shares. Standard & Poor's index of 400 industrials fell .94 to 184.90, and S&P's 500-stock compos-

ite index was down .72 at 165.75.

TECHNOLOGY

eramics, Able to Take Heat, Move Far From the Kitchen

By JOHN HOLUSHA

New York Times Service ETROIT - Ceramic materials, best known as the basic material of tea cups, are under intense development as replacements for metals in applications ranging from artificial hip joints to auto engines.

Ceramics, of course, are brittle. And, since most are very hard, icy are difficult to machine into technologically sophisticated

But there also are ceramics that hold their shape at temperaares high enough to melt metal, that do not expand much under uch heat and that resist corrosion and wear. These properties nake ceramics attractive where temperatures are high and the nvironment hostile.

In addition, most ceramics are based on abundantly available naterials, such as silicon and duminum, in contrast to the The auto industry

elatively scarce cobalt, nickel and other ingredients that go nto the more exour metal al-oys. The newer ceramic mate-ials are usually referred to as ingineering ceramics, or fine

biggest market for new ceramics. With their resistance to cor-

is seen as the

rosion and hardness, ceramics are being used by doctors as replacements for such body parts as hip joints and teeth. They are also being used as the cutting surface in high-speed tools, and to tine containers holding hazardous chemicals.

But it is their potential in mass-market industries, such as cars,

that prompt forecasters to estimate that the market for the materials will be as large as \$10 billion a year by the year 2000.

Some Japanese automakers are planning to make the rotors in the turbochargers of their vehicles out of ceramics. Because a ceramic part has less mass than a metal rotor of the same size, it can accelerate faster as the exhanst gas flow increases. That would reduce the annoying performance lag that has plagued

The big payoff in the automotive field, though, could come from the development of engines able to operate at temperatures high enough to use much of the heat energy of fuel that is now

In current engines, for example, a radiator at the front of the car is necessary to cool the engine sufficiently to prevent the metal distorting. But it also dissipates energy.

"On a gasoline engine, about one-third of the heat energy is lost to the radiator, one-third goes out the tailpipe and about one-third is useful work," said Alvin M. White of the Batelle Memori-

EVERAL automobile and truck companies are working on so-called adiabatic, or heat-retaining, diesel engines that have ceramic cylinder liners and eliminate the conventional water-cooling system. Combined with turbochargers, which help recapture some of the energy in the exhaust-gas stream, engines of this sort can considerably increase fuel economy by simply using more of the energy in each gallon of fuel. Adiabatic diesels are expected to find use in heavy-duty trucks later in this decade.

The use of ceramic turbines in gas-turbine engines is also being

studied. Again, the search is for greater fuel efficiency by operating at higher temperatures. A ceramic turbine could operate at 2,500 degrees Fahrenheit (1,371 degrees Celcius), compared with about 2,000 degrees for metal. The higher temperature could increase fuel economy 30 to 40 percent, according to John Buppert of Garrett Corp., which is developing gas turbine auto-

But quite a few problems remain to be solved before ceramic

The National Council for U.SChina Trade also said Wednesday that U.S. companies formed 31 ventures with Chinese partners in the first nine months of 1984 — more than the total of the preceding four years. "We're quite upbeat," Christopher H. Phillips, president of the council, said in an interview. "Having lived with this thing for the last 12 years, we've learned to avoid extremes of euphoria and pessimism," he said. "But because of what the Chinese themselves are doing, the situation now is more encouraging than it's ever been." The council, formed after the Nixon administration's opening to China in 1972 to promote commercial links, has a membership of 430 companies. Its president, Mr. Phillips, is a former diplomat and banker.	U.S. exports to China should exceed \$3 billion next year and grow faster than China's exports to the United States, according to council projections. China had a surplus of about \$400 million in trade with the United States this year but that is expected to be wiped out in 1985. Most of the rise in U.S. exports will come in manufactured goods and high-technology products, Mr. Phillips said. U.S. commodity exports, while remaining significant, are expected to shrink as a proportion of total exports. Grain sales should be between \$500 million and \$1 billion, even in the absence of a long-term agreement. The council predicts continued growth of Chinese exports to the United States. Textile sales, which accounted for nearly one-third of Chinese exports in 1984, will continue rising, especially as the Chinese shift toward higher value-added textile products, the council forecast. The two-way trade with China of

Tokya stock and government-hand markets were to be open or a half day only Friday. Tokyo stock and government-bond markets offices will be closed Saturday.

Manila Asks New Debt Halt

90-Day Delay Runs Out Soon

MANILA — The Philippines is seeking a new 90-day moratorium on principal payments on its for-eign debt as the country negotiates a restructuring of \$5.75 billion in maturing commercial loans, Prime Minister Cesar E. A. Virata said

The Philippines, which has for-eign debt of about \$26 billion, was regularly renewed since then, was next due to expire in January.

Mr. Virata said the country needed the extension because it did not reach agreement on the com-mercial debt rescheduling that he has been negotiating for more than a year with a New York-based committee representing more than 400 foreign commercial banks.

Mr. Virsta, who is also finance minister, returned last week from Paris, where he concluded an agreement with representatives of 15 foreign governments and multilateral institutions on rescheduling \$1.1 billion in official loans over 11

He did not say when he hoped to conclude a similar agreement with the foreign banks. Earlier, those banks had pledged to grant the Philippines \$851 million in new loans and extend \$3 billion in trade

The International Monetary Fund had agreed earlier to grant the Philippines a new standby credit of 615 million special drawing rights (slightly less than \$615 million), which the government of President Ferdinand E. Marcos even it needs along with the long says it needs, along with the loan restructuring, for the country to survive its worst economic crisis since World War II.

Mr. Virata raised the possibility that the Philippines would have to ask for still another extension, in addition to the one that he said on Thursday had been requested. Both would presumably be for 90 days.

Sandinists Follow Harvard Model

Business School Still Survives In Managua

By Stephen Kinzer New York Times Service MANAGUA — When Presi-dent John F. Kennedy asked the Harvard Business School to help establish an institute to train executives in Central America, he envisioned a program whose graduates would spread the the-ory and practice of capitalism

throughout the region. Almost two decades after the Central American Institute for Business Administration came into being in Managna, thou-sands of its graduates are among the region's most important and successful business leaders. But since the Sandinist revolution five years ago, the student body has changed discernibly and some observers have questioned whether the institute has a future

in Nicaragua The student body now in-cludes many Sandinists seeking to learn bow to run government agencies or how to administer the farms, factories and other businesses that have come into

government hands. Last year, some anti-Sandinist Nicaraguans began to grumble that the school was a training ground for the leftist government and should no longer be eligible for support from the Agency for International Development, the Inter-American Foundation or

Professor Benito Cobb teaching at the Central American Institute for Business Administration in Managua.

other U.S. agencies that have been contributing to its budget. But before a crisis could arise. senior Nicaragnan business lead-ers reaffirmed their support for the school's policy of accepting students from the public as well

as private sector. Some Sandinists are said to be questioning the need for a traditional business school in the kind of revolutionary society they are trying to build. And with some Sandinists and some business people alike criticizing the school, it is having to defend its

"Karl Marx and Adam Smith are pretty irrelevant to what we're doing here," said John C. lckis, a Harvard Business School graduate and former Peace Corps worker who is one of the school's administrators. "Regardless of who is in power, there is a need for people who are able to behave rationally. Nicaragua will be a better place in the long run if more people know how to

The institute, known by its Spanish acronym, INCAE (for Instituto Centroamericano (Continued on Page 13, Col. 1)

Japan's Surplus Narrower on **Current Account**

TOKYO — The surplus on Ja-pan's current account — a broad measure of trade including mer-chandise as well as nonmerchandise items such as services - parrowed to \$2.90 billion in November from \$3.89 billion in October but grew from \$825 million a year earlier, the Finance Ministry said

It said the overall balance of pay-ments was in deficit by \$2.03 billion in November, compared with a \$274-million deficit in October and a \$1.08-billion surplus a year earli-

Seasonally adjusted the balance of payments deficit was \$680 mil-lion in November, against \$737 million the month before. The balance of payments has shown a defi-cit for 10 of the past 11 months.

The November surplus for merchandise trade was \$3.85 billion, against \$4.50 billion in October and \$2.04 billion in November 1983, the Finance Ministry said.

Exports in November fell to \$13.85 billion from \$14.78 billion from \$14.78

in October but were above the \$12.18 billion in November last year. Imports were \$10 billion, against \$10.27 billion in October

and \$10.14 billion a year earlier.

The November deficit in nonmerchandise trade widened to \$794

million from \$490 million in Octo-ber but down from \$1.07 billion in November 1983, the ministry said, It said November's transfer-payments deficit was \$156 million compared with \$125 million the previous month and \$146 million a year ago.

The long-term capital-account deficit widened to \$4.87 billion in November from \$4.02 billion in October and \$1.39 billion a year earlier. The short-term capital account deficit narrowed to \$66 mil-lion from \$698 million in October and compared with a \$1.56-billion surplus a year earlier.

The errors and omissions account left a deficit of \$1 million. against a \$556-million October surplus and a \$78-million surplus in November 1983.

Dollar Surges; Gold Off Sharply

NEW YORK - The dollar made sharp advances Thurs-day, catching many dealers by surprise. The British pound fell to a record low. Gold plunged to \$307.25 an ounce in London from \$313.50 on Dec. 24.

Dan Holland, vice president at Discount Corp. of New York, said much of the surge came from corporate year-end demand. He said the dollar got an additional boost from the relatively high federal funds overnight rate, 8½ percent.

In late New York trading, the British pound was at \$1.16065, down from \$1.1655 Wednes-day; in London it closed at \$1.1643, down from \$1.175 Dec. 24. The Deutsche mark was trading at 3.151 to the dol-lar in New York, against 3.1295 Wednesday; in Frankfurt it was 3.13395, up from 3.12525. The French franc traded in New York at 9.64 to the dollar, compared with 9.575 Wednesday, while in Paris the frane closed at 9.62 against 9.58.

Craxi Report Cites '84 Gains in Italian Economy

ROME — The past year was generally positive for Italy's economy although a number of problems pared with a 13-percent rate of gain same 1983 period.

day in the weekly business magniful remain, according to a report a year earlier.

Meanwhile, the Bank of Italy zine Il Mondo, the head of the still remain, according to a report published Thursday by the office of Prime Minister Bettino Craxi.

According to the document, gross domestic product has increased 3 percent this year, slightly surpassing earlier forecasts of a 2-

It added that Italy's public sector deficit had overshot earlier targets, rising to 93,000 billion lire, (\$48.3 billion) compared with an official target of 90,800 billion lire. The rate of inflation also fell dur-

ing the year, it said. The November first 10 months of 1984 stood at 1983, and 9.9 percent in January consumer price index rose at an 14.271 billion lire compared with a 1984.

deficit of 10,237 billion lire for the In an interview published Thurs-

a year earlier.

Mr. Craxi's government is attempting to reduce inflation to 7 percent by the end of 1985, al-though the December rate is reliably predicted to be about 9 per-

The review said the main problems facing the Italian economy were an increased foreign trade deficit, rising imemployment and the continuing high cost of money.

According to latest figures, Italy's cumulative trade deficit for the 1984, up from 9.7 percent in July through negotiations.

Meanwhile, the Bank of Italy zine Il Moodo, the head of the raised its official discount rate to Private Employers' Association, 16.5 percent from 15.5 percent last Lucchini, said he was "cautiously optimistic" about economic prospects for 1985.

"In 1984 we managed to link ourselves to the international recovery thanks to the successes we achieved in the fight against infla-

Construction Activity Reported Up 8% in U.S.

months of shiggish activity, com-mercial contracting pushed total U.S. construction activity ahead by 8 percent in November, the F. W. Dodge Division of McGraw-Hill Information Systems reported

The study by Dodge, a specialist on the U.S. construction market, said the start of \$16.9-billion worth of new activity raised its seasonally adjusted index of total construction to 158 from October's 146 and September's 144.

George A. Christie, a Dodge economist, said the rekindling of building activity might be in part the result of the business community's concern about the possible loss of accelerated-depreciation provisions under a proposed federal tax revision, rather than the prospect of a "growth recession" that some

economists have been suggesting.

By segment, November's gain nonresidential building was \$6.4 billion, up 5 percent from October. A 60-percent gain in indus-nial building and a 20-percent in-crease in office building claimed

By Clyde H. Farnsworth

U.S. Group Predicts

Rise in China Trade

NEW YORK - After two percent drop in institutional buildings adversely affected November's strength in commercial and industrial contracts.

Residential activity advanced percent after seasonal adjustment to \$7.6 billion.

Residential building held about steady as a drop in multifamily housing canceled most gains made in single-family structures. On a year-to-date basis, total construction through November 1984 amounted to \$196.1 billion,

up 9 percent over the comparable 1983 period. In another upbeat report, the National Association of Realtors said Thursday in its monthly report that sales of existing single-family homes soured in November, following six consecutive monthly de-

The median price of a home also rose, reflecting the higher demand, to \$72,500, an increase of \$500 from October levels.

November resales were 7 percent above the sales rate of November

Arbitragers Could Lose \$100 Million on Phillips

By Fred R. Bleakley
New York Times Service

NEW YORK - Wall Street's arbitrage trading community stands to lose at much as \$100 million if the stock of Phillips Petroleum Co. does not recover from the plunge is took Monday, arbitragers say. Most heavily exposed, they say, is the company headed by tvan F. Boesky, the most active

professional arbitrager.

Ivan F. Boesky Corp. is believed estimated to million to 12 million shares purchased by professional arbitragers in recent weeks. Phillips's shares fell 871/2 cents Thurs-

Swissair Expects Net To Be Higher in '84

ZURICH - Swissair AG expects higher profit in 1984, a company spokesman said Thursday. He added that the forecast came in a letter to employees from Robert Staubli, the chairman, but that the letter gave no precise figures. Last year the airline reported a re-cord net profit of 56.3 million

Swiss francs (\$22.5 million). In early November, Swissair predicted that 1984 profit would roughly equal 1983's. In the letter, Mr. Staubli said the airline expected positive results in 1985, with profit at similar levels to 1984 and 1983.

search and teaching.
The suggestion that such an in-

stitution would stimulate regional

day on the New York Stock Ex-change, to \$45.25, or about \$9 below the \$54-to-\$55-a-share average price that other arbitragers say Mr. Boesky paid for his position.

Mr. Boesky refused to comment on the reports Wednesday. The potential loss for Mr. Boesky and for Wall Street "could the biggest black eye the arbitrage community has suffered since Cities Service," one trader said, referring to the losses when the Justice Department broke up the planned union of Gulf Oil Corp. and Cities Service Co. in 1982.

Arbitragers buy securities of companies in takeovers or reorganizations with an eye toward selling at a higher price in a relatively short time. Usually they borrow to leverage their positions. That leads them to sell quickly, in order to avoid further interest costs, if it appears that the takeover is not on track, as happened with Phillips.

Many arbitragers, including Mr. Boesky, have reportedly already taken some of their losses in Phillips. Monday, 4.9 million shares changed hands and Phillips's stock dropped \$9.25 in reaction to the company's amouncement that it would restructure itself to avoid a takeover by a group led by T. Boone Pickens.

Mr. Boesky reportedly sold major blocks of shares in 12 other companies Monday to repay mil-lions of dollars in bank borrowings for his Phillips shares. His position, estimated to be 5.5 million to 7 million shares, represented an investment of about \$300 million.

McDonnell Douglas to Start Producing MD-87 Jet

LONG BEACH, California -McDonnell Donglas Corp. says it will begin producing the MD-87 jetliner next year after having received orders for 12 of the aircraft.

The orders, placed by Finnair and Austrian Airlines, are valued at about \$240 million. Deliveries are expected to begin in late 1987, ac-cording to officials at Douglas Air-craft Co., the Long Beach-based McDonnell unit that produces commercial aircraft.

The MD-87 is a shrunken version of the company's existing MD-80 family, with about 25 fewer seats and about 17.5 feet (5.25 meters) chopped out of its fuselage. The typical MD-80 carries 155 pas-

James Worsham, president of Douglas, said in a recent interview that the MD-87 would cost \$50 million to \$75 million to develop. He said that about 93 percent of the MD-87's parts would be common to the MD-80, thus reducing development costs.

Mr. Worsham said the aircraft is designed as a "companion piece to the MD-80," meaning that the aircraft has a range equal to larger MD-80 family jets and similar operating requirements. Thus, the less expensive MD-87 could easily be substituted on a spot basis for larger capacity jets, depending on pas-senger loads, he said.

The MD-87 announcement was widely expected. McDonnell had received orders for eight of the aircraft from Finnair as of last month and was waiting for final confirmation of the Austrian Airlines order before launching the program.

AMSTERDAM DEPOSITARY

lam. December 19, 1984.

Australia is getting out from down under

days. One that's drawing it much closer to foreign business and financial leaders.

Why? Australia's inflation rate is nearing a ten-year low. Prospects for wage stability, based on union agreements, are brighter than ever. A relaxed regulatory environment is opening the way for foreign banking operations.

The country's strategic Pacific Basin location, coupled with its rich natural resources, makes Australia one of the most attractive foreign investment opportunities in the world today. Could your company or firm take advantage

of these opportunities? A highly-select group of internalional business executives, bankers and investors will gather in Melbourne, at the Regent Hotel, on February 10-12, to discuss the possibilities.

The occasion is The Australia Forum: Opportunities for Investment and Corporate Finance, a meeting sponsored by the state government of Victoria and leading international business organizations in conjunction with Institutional Investor.

You, or another senior executive of your organization, can hear first-hand about Australia's prospects for rapid economic expansion... which industries the government has targeted as important growth areas...and how deregulation is fostering new opportunities for foreign financial institutions in the Australian economy.

Prime Minister Bob Hawke and Treasurer Paul Keating are tentatively scheduled to address

the meeting, as well as senior executives of Australia's leading corporations, financial institutions and business advisory firms.

The Forum will provide ample opportunity to meet formally and informally with your Australian hosts as well as other leading political and economic figures who will be in attendance. There is no registration fee for The Australia

Forum. However, attendance will be strictly limited to a select group of senior executives with a bona fide interest in Australia, which means a. prompt response is important to secure your

If your company is interested in Australia. The Australia Forum could introduce you to the important business opportunities-and business contacts-you need to succeed "Down Under." FORUM SPONSORS INCLUDE: Government of Victoria

Toronto, Bourse In Computer Pact

International Herald Tribune TORONTO - The Toronto Stock Exchange is selling its com-puter trading system to the Paris Bourse on an experimental basis for three to six months, the exchange has announced. Paris brokers and traders will be

using a computer in Toronto before the Toronto exchange opens. If the trial is successful, the Bourse will 1st Hoff buy the Computer Assisted Trading System, known as CATS, from the Toronto Exchange. Terms of the arrangement, announced last 1st Quar. week, were not given.

The CATS system allows brokers to enter, buy and sell orders from a computer terminal, thus eliminat-ing the need to have a trader on the floor of the exchange. There are still traders on the floor in Toronto, and CATS is used to handle 800 stocks that do not trade frequently. The Bourse will use the Torontopased computers from 9 A.M. to 2

Per Aut Pay Rec 0 40 1-11 1-4 S & P Predicts **Corporate Profits**

Will Be Flat in '85

The Associated Press
NEW YORK — U.S. corporate roughly flat" in 1985, Standard & Poor's Corp. predicted Thursday.

The steel industry in 1985 should have its first profitable year since 1981, Standard & Poor's standard & Poor's said in its profitable industry in 1985 should have its first profitable year since 1981, Standard & Poor's said in its proposal in the standard & Poor's said in its proposal in its annual industry forecast. It said that the airline, automobile, chemical and semiconductor industries could expect higher profits than they had this year, but that the coal,

oil and homebuilding industrie were likely to see profits fall. The economy in 1985 will experi-ence a "sluggish start," said David Blitzer, the company's chief econo-

Mr. Blitzer said the economy would "strengthen in early spring would "strengthen in early spring and then register slow but steady growth through the end of the year." But he added that the projected economic upswing would "probably be too little and come too late to boost corporate profits much beyond their 1984 level."

He said 1985 would "be a real test of the streamlining and tough.

test of the streamlining and tough-ening of American business that went on during the maelstrom that was the 1981-82 recession."

Saudi Arabia Devalues Riyal

MANAMA, Bahrain — The Saudi Arabian Monetary Agency devalued the riyal Thursday from 3.56 to the U.S. dollar to 3.58, dealers in the Gulf said.

ASEA Names Unit Chiefs

In Portugal, India, Sweden

By Brenda Hagerry International Herald Tribute LONDON — The Swedish electrical and electronic engineering group ASEA AB has appointed new managing directors for subsid-iaries in Portugal, India and Swe-

BUSINESS PEOPLE

Mr. Bergman.

Lars Torseke has been appointed managing director of AB ASEA-ATOM, a unit based in Vasteras, Sweden. He succeeds Lars Halle, who has been managing director of the company since it was formed in 1969. Mr. Torseke will continue as bead of ASEA Generation. Mr. Halle will become deputy chairman of the board of ASEA-

ATOM. He will also represent the company's interests in the international nuclear market, act as a consultant and undertake special as-

engines can be mass-produced. For

example, ceramics are so hard they

have to be machined with dia-mood-tipped tools, and they be-come more difficult to fabricate as

the size increases. Further, they are

hard to join to other materials and

their low rate of expansion when

heated makes them hard to pair with metals. All these difficulties

have helped keep the cost of ceramic parts well above metal ones, ex-

cept for some special applications.

provide information for the on-

manager to principal manager of Swiss investment services, based in

H. A. al Petersens has been appointed vice president of Swiss in-vestment services for Lloyds Bank. loternational, based in Hong Kong. Before taking up his new Tommie Bergman has become post, he was area manager, busi-managing director of ASEA Eléc-oess development (Scandinavia), in trica Lda, based in Lisbon. He succeeds João Nuno Ferreira Bra-don headquarters. He is being suc-

Tommie anaging director or rica Lda, based in Lisbon.

succeeds João Nuno Ferreira Braga, who is taking up a post outside the ASEA group.

Named managing director of ASEA Ltd. in Bombay was Arun Thiagarajan, previously managing of Flakt India Ltd. Calmor of Lloyds Bank International was Geoffrey H. Clayton.

Ray C. Seamer succeeds Mr. Clayton as principal manager in Egypt.

Ray C. Knight has become and representative mank International representative mank International representative mank International representative managing director of the ASEA and previously asserted in true.

Outhout previously asserted in true. ton as principal manager in Egypt.
Peter R. C. Knight has become
vice president and representative
for Mexico for Lloyds Bank International. He moves to Mexico City from his post as manager of the bank's Pittsburgh branch.

Samuel Montagu & Co. has appointed Robert J. Opiat general manager of its Singapore office. Mr. Opiat, an executive director of the London-based merchant bank, is also responsible for banking and finance activities in the Asia-Pacific region. He succeeds Christopher A. Clarke, who is returning to Lon-don, where he will have direct and coordinate Samuel Montagu's corporate-finance activities in the

Asia-Pacific region.

WestLB International SA, Lux-Lloyds Bank International Ltd., embourg, bas camed Eckhart to grow in 1985, boosted by exports

tors of newer models. Many of

nior vice president of the Düssel-dorf-based parent company, Westdeutsche Landesbank Girozentrale, now co-manages WestLB International with Wolfwest is international with wongang Spehr. Mr. Mauersberger succeeds Manfred Steinhoff, who has
taken up a post in the accounts
division of West in Düsseldorf.
Lloyds Bank has formed a treasury division to be headed by Alan

The Mosen who becomes more

E. Moore, who becomes group treasurer Jan. I. The London-based bank said the division would combine the money-market operations and foreign-exchange and deposit-dealing activities of Lloyds Bank PLC and the exchange and money-market division of Lloyds Bank In-ternational. J. W. Bullock, assistant general manager of Lloyds Bank's overseas division, will be seconded Jan. I to the treasury division to be Mr. Moore's deputy.

Imperial Chemical Industries
PLC of London has appointed J.
Trevor Harrison treasurer, effective April 1. Mr. Harrison, who has been a deputy treasurer since April 1983, will succeed John Crowe, who is retiring. Named assistant treasurers starting March 1 were Philip G. Rogerson and Bernard Rissik. Manufacturers Hanover Trust

Co. has named Lewis Coles, Keith Dixon, Anthony Jones and Roger McInnes assistant vice presidents. They are in the New York-based bank's London branch.

Royal Bank of Scotland Group PLC has named John A. Barciay executive vice president for North America, effective March 1. He will be based at the group's New York office and will represent the Royal Bank of Scotland Group and its two con-stituent banks — Royal Bank of Scotland and Williams & Glyn's until their planned merger
 Oct. 1, thereafter representing
 the merged bank. He succeeds Stephen Burrows, who returns to Britain to work in the group's domestic banking division.

German Growth Seen in '85

FRANKFURT - The West London, has announced the promotion of Rene G. Keller from Mr. Mauersberger, previously a semotion of Rene G. Keller from Mr. Mauersberger, previously a semotion of Rene G. Keller from Mr. Mauersberger, previously a semotion of Rene G. Keller from Mr. Mauersberger, previously a semotion of Rene G. Keller from Mr. Mauersberger, previously a semotion of Rene G. Keller from Mr. Mauersberger, previously a semotion of Rene G. Keller from Mr. Mauersberger managing director. could act as a brake on expansion, both Dresdner Bank AG and Bank **High-Tech Uses for Ceramics** für Gemeinwirtschaft AG said Thursday in their economic re-

Bank für Gemeinwirtschaft said gross national product in 1985 should again rise at about the 2.5to 3-percent rate estimated for this year, with the strongest impetus coming from exports. The gross nabonal product is a measure of the total value of a nation's goods and ations in exchange rates, and the services. These GNP figures are adinsted for inflation.

In its report, Dresdner said The upward trend of the economy German economy should continue should continue in 1985. Major driving forces will probably again be exports and fixed-asset investment.

Strong export performance is encouraging West German companies to invest, especially as the fioancial position of many bas improved following two years of recovery and as interest rates have falleo. New technical developments and the necessity of streamlining operations also are encouraging investment, Dresdner said.
It sees GNP growth of 2.5 to 3

percent next year, although fluctuconsequent effect on exports, remain a risk.

THE INNOCENT EYE: On Modern Literature & the Arts

By Roger Shattuck. 362 pp. \$18.95. Farrar Straus & Giroux, 19 Union Square. New York, N. Y. 10003.

Reviewed by John Gross

N OVEMBER'S issue of the French maga-zine Lire contained an interesting feature about some of the leading interpreters of French culture in America today. One of those interviewed was Roger Shattuck, who said that be considered himself above all a journalist and that he was proud to do so. A work of literature, he insisted, has a right to exist on its own terms without being cast in the mold of a preconceived theory or dogma; and to do justice to its unique qualities, it calls for a spirit that is journalistic rather than academic.

When Shattuck, who is a professor of French at the University of Virgioia, calls himself a journalist, it is admittedly in a rather specialized sense. He is the author of some notable books, beginning with his classic account of the origins of the avant-garde in pre-1914 France, "The Banquet Years." But he has also contributed essays and reviews to a wide range of periodicals, and he has now collected the best of them in a book, together with four previously unpublished pieces.

The subject matter of "The Innocent Eye" is predominantly French and predominantly modern. But within those limits there is a great deal of variety. Shattuck writes about the visual arts as readily as he does about literature. He deals judiciously with personalities as dissimilar as Antonin Artaud and Meyer Schapiro. He has the knack of fastening on an aspect of the author or artist he is discussing that is arresting and dramatic as well as revealing — the use Balzac made of the double meaning that usure has in French (usury but also erosion), the philosophy behind the set of inscriptions that Paul Valery produced for the Palais de Chaillot in 1937.

He is also equally at home with social history and with the play of ideas. One excellent piece (based on original research) lays bare the machinations of the international congress af writers that was held in Paris in 1935, at which distinguished figures were ostensibly mobi-lized in defense of freedom but in practice dragooned into supporting the official Soviet line. Another essay, no less striking, analyzes the art of Rene Magritte and the mixture of amusement and apprehension it generates in terms of the Irish bull. An Irish bull, as the saying goes, is always pregnant,

Beneath its variety. "The Innocent Eye" possesses a considerable degree of unity. Not of a systematic kind — that would scarcely be possible in a gathering of pieces written on such widely scattered occasions. But without being unduly repetitious Shattuck circles round the same ideas and comes back to the same questions. And his boldest theme is also his most pervasive - a repeated attempt to relate works of art to nothing less than the constitution of the human miod and the nature of physical reality.

Two pieces stand out in this respect. Ooe is a consideration of why Sigmund Freud and Paul Valery were drawn to write about Leonardo da Vinci at roughly the same time; Shattuck argues that they valued him above all (and this irrespite of Freud's dualistic terminology) because he demonstrated that the apparently separate that the apparently separate that the mind spring from the same energies of the mind spring from the same source, that mental activity is ultimately indivisible. The secood key essay is an interpreta-tion of the later art of Claude Monet, the Monet who withdrew to his garden and his lily ponds - only what he was really doing, we are told, was training himself to see in nature what the physicists of his time were also revealing, a universe characterized by vibrating particles of matter and unifying lines of force.

While a nonscientist can hardly hope to judge the full validity of these ideas, both essays (and others in the book in the same vein) The only risk with Shattuck's approach is that he is liable to find himself excessively concerned with mental processes rather than thought content. One of the new essays is an account of a "calligram" or typographically shaped poem by Guillaume Apollinaire, written - or devised - in 1914, which Shattuck presents as the literary equivalent of the innovations being made at that time by Pablo Picasso and Igor Stravinsky. It is possible, however, to be persuaded that the poet succeeded in his aim of giving his lines "geometric, mimetic, and schematic shapes based on plas-tic composition," and still feel that the result is no more than a gadget, an ingenious verbal, contraption.

contraption.

Yet while Shattuck remains loyal to the avant-garde he espoused in "The Banquel Years," he has many doubts about what he calls — in another new essay and a brilliant one — "the demon of originality." Have experimental artists considered the possibility, he asks, that we might be approaching "a flattening of the curve of invention"? Have they (and we) been misled by a false analogy between scientific and artistic experiment?

Here as elsewhere a strong current of com-mon sense runs through the book. It can also be seen to advantage in some timely reflections on the triumph of "the metaphysical picaresque" io so much recent fiction - fantasy spinning out of control. Don Quixote taking to the road without benefit of a Sancho Panza; Not that be is an enemy of theory as such; but he reminds us that it is a lesser activity than looking at individual works "with as innocent" an eve as one can attain."

John Gross is on the staff of The New York

Yugoslav Artist Wins **Tokyo Cartoon Contest**

The Associated Press

TOKYO - Dusan Petricic, n Yugoslav-Lartist won top honors Wednesday in a cartoon contest run by the mass circulation newspaper Yomiuri Shimbun. There were 2,872 entrants.

Petricic won 1 million yeo (about \$4,000) for his whimsical drawing of a painter on his way to paint a tunnel with cans of bright paint, they said. His entry and other prize-winning cartoons will be exhibited throughout Japan in January, organizers said.

Now in its sixth year, the Yomiuri contest drew entries from 58 countries.

BRIDGE

By Alan Truscott

N EW methods of signaling. however sensible, take a long time to gain acceptance. One example is the upsidedown method, in which a high card is discouraging. This is now finding favor among ex-perts some 30 years after it was ntroduced in Europe.

Another is the Smith Echo, invented by I. G. Smith of England more than two decades ago. It allows the defenders to indicate their attitude to the suit first led by a signal in the suit played by the declarer.

A good example is the dia-gramed deal. The defenders were using "attitude leads against no-trump in which a take with the club jack and small card shows enthusiasm shift to the diamond queen. South guessed right by duck-

U.S. Sports in '84: Implausible but True

By Thomas Boswell Vashington Post Service

WASHINGTON - The past year in sports was so packed with events, so loaded with oew games and oew leagues, so inundated with young billionaire stars breaking old records and so chock full of tales of buman interest and homes froils, they she est and human frailty that the realm of athletics became inflated to the point of bursting.

When you try to condense and redigest it, the real shock about 1984 is that those 12 months of sport seem as dense in detail and drama as several years put to-gether used to be. Is this the Golden Age of Games, or the beginning of sports satiety? In 1984:

 Sugar Ray Leonard retired minutes after a comeback victory, and Swale died just eight days after adding the Belmont Stakes to a Kentucky Derby victory.

• The Washington Redskins

had the worst Super Bowl defeat ever in January, yet, by Decem-ber, had redeemed themselves by winning their division title again despite constant injuries. Mean-while, the NFL champioo Los Angeles Raiders limped to a wildcard spot and were eliminated by the Seattle Seahawks.

• Robert Irsay stole the Colts from Baltimore in the middle of the night; Leonard Tose almost snatched the Engles out of Phila-delphia to cover his casino debts, and Al Davis shook the NFL by going to the Supreme Court and proving that he could move his Raiders anywhere he wanted.

 Pete Rose started the year in 4,000-hit glory, turned into an aged bench warmer by midseason with the Montreal Expos, then, in September, was suddenly the hard-hitting player-manager of his bometown Cincinnati Reds.

• The runner Carl Lewis could win the same four gold medals in

Los Angeles that Jesse Owens eaptured in 1936 in Berlin, yet mehow rub the public so wrong that he ended the year less of a

hero than he began it.
The connection between all these events, and many others like them, is their unexpectedness and, therefore, the cumulative sense that as contemporary sports fans, we are always playing catch-up, trying to digest the latest landmark, appreciate the newest hero.

Doubling our sense of the density in our sports calendar was the fact that this was a year in sports when anything could happen, no

matter how improbable.

Perhaps a bigger shock than any individual Olympic performance was the realization that the Games were generally regarded - at least in the United States — as a major success, despite the Soviets' back-at-you boycott. The Los Angeles Olympic Committee turned a profit in the bundreds of millions, a first

It was the sort of year in which the Chicago Cubs could become summer's darlings by going from the next to last place to the play-offs behind a castoff pitcher (Rick Sutcliffe) with a 16-1 record, then blow the National League pennaot with three straight losses, the last defeat going to the same Sutcliffe.

It was a season when the most improbable collection of division winners ever - the Cubs, San Diego Padres and Kansas City Royals - could join the world champioo Detroit Tigers in the baseball playoffs.

No long shot or comeback seemed too ludicrons to come true this year.

For example, the New York Islanders, after winning four straight Stanley Cups, had the National Hockey League's top prize taken from them by Ed-When Mary Lou Retton oceded back-to-back 10s in her final events to win the women's gym-nastic Olympic gold, she did it. When Greg Norman needed to In individual sports, the same

Taking Care of Business and Football By Malcolm Moran

New York Times Service

NEW YORK - The education of Derrick Harmon took a different turn last winter, a direction that has little to do with achieving a degree in engineering physics at Cornell. Last winter Harmon attended two seminars to learn about a business that has often, to his disappointment interfered with the business of getting an education.

He went to seminars oo professional football, invitation-only af-fairs in Scattle and New Orleans. These were much more than tryout camps. These were places where dozens of players were examined, that he had decided not to play drilled, challenged, filmed, studied, football. After missing seven days compared and evaluated. In those of camp, Detrick returned, he said, antiseptic settings, far from the partly to demonstrate to his brothbands and the emotion of lining up ers that it was possible to succeed for the big game, all those athletes discovered how much marketability they possessed, or how bitle. And what Derrick Harmon

learned was that he belonged. "It opened my eyes," he said. "All I really wanted was an opportunity, and after the camps, I was convinced that was all f occided."

Harmon, a ninth-round choice of the San Francisco 49ers, the 248th player selected in the draft, will play against the Giants on Saturday in his first playoff game. He rushed 39 times for 192 yards in the rie was named second-team all-regular season, and returned 13 American by The Sporting News kickoffs for an average of 27.5 and earned honorable mention In his progression from Bayside

High School in Queens to Cornell to a Super Bowl contender, Harmon has helped reverse the feeling that football teams should not look to New York City high schools or Ivy League colleges for their talent.

When Harmon was at Cornell mon has helped reverse the feeling When Harmon was at Cornell and Bayside, he felt strongly that

the football business was not yet supposed to be a business, and he it. He's always been supportive." went through an uneasy accep-

tance. "Football doesn't rate that intrusion. "Whereas the college life high on my priority chart," he said is understood to be an amateur activity," Harmon said, "that in two years ago.

He resented a recruiting process theory is supposed to be fun for all that forced him to miss class time who participate, and beneficial for and spend hours at night talking to persistent strangers. He wanted to play running back at Cornell after a high school career as a quarterback of the Commodores, because of the commodores, because of the college when I came out of high school I had the illusion of bow football is supposed to be on the college level. I understood profewer demands on a running back's the college level. I understood pro football to be what it is."

Though the odds of making the United States Football League might have seemed more in his favor last winter, Harmon chose the NFL for the rarest of reasons because a spring season would have delayed the completion of his degree requirements. Sometime soon. after the season is over, he plans to consider what will he done with

For now, his plans extend little His career total of 3,004 yards at further than a kickoff Saturday. Sooo the range will reach a little Marinaro. He was graduated with a longer, beyond his pro career.

"I'm getting a little older now," said Derrick Harmon, age 21.

Budd to Compete In First Race Since Olympics

JOHANNESBURG - A tightlipped Zola Budd flew to Switzer-land Thursday to compete in an eight-kilometer (five-mile) road race Sunday, her first competition since the Los Angeles Olympics in

The South African-born runner, who became a British citizen in April, refused to speak to reporters at Jan Smuts International Airport as she left for Europe, and a scheduled news conference on Saturday in Zurich reportedly was canceled.

Budd, 18, has been engulfed in controversy since she left South Africa secretly and was granted British citizenship in time to run for Britain in the Games. South Africa is banned from most international sports compentions because of its system of racial separation, apart-heid.

Budd's clash with Mary Decker of the United States in the 3,000-meter race ended with a collision that left Decker in tears oo the infield. Budd was disqualified briefly, then reinstated to a seventh-place finish.

She announced in November that she was giving up her interna-tional career and would stay in South Africa, but then reversed herself and said she would run in Zurich and decide her future later

ACT

Dead, too, by early June, the Baltimore Orioles, blowing three big ones to the Detroit Tigers while we bake in a concrete oven in Baltimore, making June hateful. What is so unbearable as five

consecutive days of insufferable heat in June coinciding with the total collapse of the Orioles? Summer: Thousands of miles away, Democrats and Republicans took turns bawling and howling at TV cameras, bits and pieces of

which we heard oow and then while canvassing the tube for baseball. Unreality was intense.

Reality was the four consecutive days, recorded right here in the caleodar, of "dreadful dowopours," culminating oo the fourth day with a five-inch rainfall, Again, though, it was oot followed by ei-

ther a five-day cold or viral miser-ies. Instead, it cleared in time for an outdoor hirthday party for a 3year-old female. In September, we discovered Barbara Pym and read straight through five of her oovels in five

weeks. In October, a friend reached

his 75th birthday reasonably intact,

and a large group of us gathered to

celebrate. Shortly afterward, a year that had been notably devoid of

surprises failed again to surprise us. Thus Geraldine Ferraro failed to be elected the first woman vice president and the public-opinion polls failed to be ridiculously wrong in their political forecasts.

These failures followed the pattern of failure established a month earlier when the Chicago Cubs had failed to win the National League pennant. It was oow clear that 1984 was to end as a year in which life's inevitabilities would prevail over the delightful possibility of sur-

And so it proved. By December, Mitgang and I were still lunching regularly on pastrami at the Bird-in-Bush Delicatessen. "Why don't we just once order the salami and eggs?" asked Mitgang after five consecutive days of pastrami on rye. The question was purely rhetorical, for he knew the answer: 1984 was not a year for surprises.

If it had been, would I have had the five-day cold in mid-November after 15 consecutive days of incredihly beautiful autumnal weather? Still, there were great moments of a minor sort: An anniversary

remembered, a birthday remembered, that glorious day when it turned out that all the credit cards hadn'i been stolen, after all, but were merely hiding under the dining-room rug.

And, not to be overlooked, there

were two deaths, a birth and an accident possibly designed to stop our grousing about life's predictability with evidence that we may also be blessed by fortune.

The women who died have left gaps in the fabric of life, which the one who was born is probably expected to help fill. It is a heavy assignment to lay upon such a little girl, for both the others were considerable women, not easily replaced, Still, we all live by the belief that the assets we lose each year to death are being constantly replaced

by the newborn. Here in the twilight of the year I doo't feel too sure of that, or of much else, except a pending year of hlizzard, insufferable heat, dreadful downpours, five-day colds, periodic viral miseries and pastrami on

New York Times Service

Honoring the Hard Lot of a Chinese Laundryman

Eight pound iron, twelve hour day, Seven Day week, just to make it pay, Sort and wash. press and fold. Bitter rice

on a mountain of gold William (Charlie) Chin's song, "Eight Pound Livelihood"

By Marvine Howe New York Times Service NEW YORK - They came to the United States with

dreams of a gold rush and found themselves holding only a heavy iron in their hands. They were the Chinese laundry-

men, and their oumbers have dwindled over the years.

laundries in the late 1930s, there were close to 5,000 hand laundries in the New York metropolitan area; there are fewer than 2,000 today, according to Gem Chin, deputy director of the Chinese Hand Laundry Alliance. Just 10 years ago, there were more than 100 shirt-pressing shops and oow project. there are only four.

But despite his eclipse by modern wash-and-wear fabrics and dry-cleaning shops, the Chinese laundryman is being booored in Chinatown. The New York Chinatown History Project is sponsoring an exhibition of photographs and memorabilia tracing the washing shops of the 1850s to

In the boom time of Chinese today's large wer-wash factories. undries in the late 1930s, there "Historically, the hand-launderers were the backbone of the Chinese-American community and at the same time supported extended families at home, against incredible odds," said John Kuo Wei Tchen, the 33year-old U.S.-born director of the

"Chinese laundry workers are enerally ashamed of their hard lives and so we wanted to express recognition for their efforts and legacy," said ludith Luk, program director of the history project and a 29-year-old oral historian who has recorded more than 100 interviews with laundry workers. Initially, the Chinatown Histo-

ry Project believed that in recording the life of Chinese workers they were dealing with an endangered species, according to Tchen. Now, he said, it appears the industry is stabilizing, with the influx of new immigrants from China and the increase io Manhattan's working cooples who have no time to do laundry.

But Gem Chin, who is also manager of the Wah Kiu Wet Wash factory in Long Island City, New York, said there are still problems in the business. His factory employed 44 workers a decade ago and now has only 21. In Monday — the big laundry day — as it now does for the whole week. Chin, who came to the United States at age 17 and went to work in a small laundry owned by a consin because it was "the only opening," said young Chinese-Americans born in the United States who have education and skills want to become lawyers, doctors and engineers, not laun-

immigrants enter the United States yearly, according to Chin, the women seek jobs in the garment industry and the men prefer to go into trading, even selling odds and ends oo sidewalks.

In the old days, however, Chinese immigrants had only two

June Chin, in business 33 years, calls it "a terrible life."

artist. Instead, he went into the \$2.50 for a hand-pressed shirt on hand-laundry business and ended a hanger. up in shirt pressing. Chinatown was a society of

1882 Chioese Exclusion Act, which barred bringing wives and children from China.

In those days, the Chinese laundries undersold their Jewish competitors because Chioese workers usually lived in the laundries, according to Chin. In retalithe old days, the factory named ation, Jewish launderers put signs out as many packages of wash on in their windows accusing Chinese launderers of smoking opi-um and eating rats, he said.

"I warned my sons, doo't put your feet in my shoes," said Chin, who lives with his wife, a medical technologist, in Queens, New York. June Chin, a laundress who is

not related to David Chin or Gem Chin, is always oo the move, checking dirty clothes, getting them ready for pickup, ironing, Although about 50,000 Chinese sorting, packing. After a fire re-namigrants enter the United cently in her laundry oo 32d Street in Manhattan, Mrs. Chin rented a one-room shop on 30th Street for \$1,400 a mooth. She is not sure she can break even with the rising costs,

She said business was slow because many people do their own choices, the laundry or the restau- laundry now, with coin laundries rant business, according to David and wash-and-wear materials Chin, a retired laundryman. Like commoo. Teo years ago she many other Chinese, Chin, who charged 45 cents to wash and came here at age 18 in 1927, want- press a shirt. Today it is \$1 for a the customers called him: Charlie ed to go to school and become an machine-pressed folded shirt and and her: mrs. charlie.

SWITZERLAND

"Soon there will be oo more Chinese laundries in the New bachelors then because of the York area, because it's 100 hard a way to make a living," said Mrs. Chin, who has spent 33 years in the business. A widow, she recalled the years when she worked from 8 A.M. to 4 A.M. and the family lived crowded together in

the back of the store.
"It was a terrible life." she said with a sigh. She said that although things are easier cowadays, the younger generation does not want anything to do with the laundry business. She has six children, in jobs ranging from real estate to the Postal Service. None will go into the laundry husiness.

The exhibit on the laundrymen will run until mid-January at the Chinatown History Project office at 70 Mulberry Street. The exhibit later will move to the Statue of Liberty Museum on Liberty Is-One part of the exhibit is a

poem, "Parents," by Fay Chiang, who grew up in a laundry: they raised a family in the backroom of a laundry, 10' x 14, queens, new york;

1950's . . . he: worked 6 days a week, 16 hours
